

Argument in Support of 16-566

The passage of resolution 2016-03 calling for an increase in the road tax for each parcel within the mystic Mine Road Community Services District is absolutely necessary for the continuation of said District. Without the funds raised by this special tax, the District will not be able to continue funding much needed maintenance and improvements. As the county of Nevada has no responsibility for road work within the District, failure to pass this ballot measure will mean a very limited road work in the coming years or possibly the dissolution of the District. In closing, there has not been an increase in this special tax in over 20 years, and now is the time for a modest increase to sustain the District.

Respectfully submitted,

Signed:

Andrew Wedgbury

President, Mystic Mine Road Community Services District
