I know you have already heard from the others residents of Rodeo Flat Road so I won't repeat it all. I am the last driveway on Rodeo Flat where the new road would start. Out of my driveway Rodeo Flat is an 18% grade; it would be so dangerous for everyone to have an access from below. Our street is private and has many blind spots and is narrow. . All of us have had several close calls. If it were a short cut for Combie road traffic it would be a disaster. No one who is affected is for this Del Rio project it would ruin the country lifestyle we moved here for, and decrease our property values. I know they have contributed heavily to the supervisors which will make it slanted their way. Please do not let them put in this access road. If you would come out and physically look at the site I am sure you will see that this plan won't work.
