

Completing Your Consolidated Facility Site Map

Introduction: All facilities handling reportable quantities of hazardous materials and/or hazardous wastes must complete a facility site map and upload it electronically to the CERS website.

NOTE: The map template provided is optional and you may choose to use your own custom site map.

Follow the steps below to complete your map:

1. Indicate your map direction (such as a north arrow) and approximate scale.
2. Choose legend items that apply to your facility. At a minimum, show the following (if applicable):
 - a. loading areas,
 - b. internal road/adjacent streets,
 - c. storm and/or sewer drains,
 - d. access/exit points,
 - e. emergency shutoffs,
 - f. evacuation staging area(s),
 - g. hazardous materials / hazardous waste storage areas,
 - h. emergency response equipment
