

Preliminary CAG Comments and Directions Regarding the Revised County Ordinance

- 6 = I fully agree
- 5 = I find it acceptable and believe it is the best option available
- 4 = I can live with this direction, but I am not that enthusiastic about it
- 3 = I do not agree, but will go with the wisdom of the group and not oppose this
- 2 = I do not feel we have any unity of opinion on this topic and more discussion is needed
- 1 = I disagree with this direction

For each topic, please indicate your level of agreement with each statement using the scale provided. Provide comments in the box at the right of each item.

Topics		Level of Agreement	Comments
1	The County should consider prohibiting outdoor cannabis activity (medical and adult use) in areas zoned R1, R2 and R3.		
2	The County should consider designating select areas of the County where cultivation for medical and adult use cannabis would be allowed based on land use and zoning.		
3	The County should consider requiring a permit for any personal grows (medical and adult use) beyond 6 plants.		

4	The County should consider requiring that a residence be located on cultivation sites.		
5	The County should consider allowing a transition period for a residence to be constructed if none exists at the cultivation site (if yes, determine if transition period should be 1, 2 or 3 years).		
6	The County should consider maintaining setbacks of 600 feet from cultivation sites to any active School Bus Stops, School Evacuation Site, Church, Park, Child Care Center, or Youth-Oriented Facility.		
7	The County should consider conducting an environmental capacity analysis to determine the level of cannabis activity that can occur within the County while avoiding significant and unavoidable impacts.		

8	The County should consider limiting the number of medical cultivation permits.		
9	The County should consider limiting the number of adult use cultivation permits.		
10	If you agree to limit permits, the County should consider developing a permit allocation process based on criteria consistent with County policy for cannabis cultivation. For example, give preference to farms owned by County residents.		
11	The County should consider establishing a permit fee and fine structure for non-compliance that is effective and timely but allows a short timeframe for self-compliance.		
12	The County should consider identifying potential funding sources to implement public education programs on: (i) the responsible use of cannabis by adults; and (ii) the potential harmful effects of cannabis use by those under the age of 25.
