

VEHICLE COUNTER-AMBUSH TACTICS (VCAT 1 & 2)

To survive a vehicle ambush you must immediately change the dynamic and establish dominance over the adversary. Students will learn tactics to counter “near ambushes” with a handgun and “far ambushes” with a patrol rifle. Students will engage targets while seated in the vehicle and rapidly address threats at close ranges outside of the vehicle. In addition, students will practice various shooting positions to engage targets from 50 meters while maximizing cover and concealment. The tactics will be validated with force-on-force scenarios. This class is not POST-certified.

Topics include:

- Demonstration of cover/concealment options around vehicles
- Counter-surveillance and pre-attack indicators
- Strategies to overcome near and far ambushes
- Live-fire shooting while seated in the vehicle
- Exiting the vehicle under fire
- Engaging targets while outside of the vehicle
- Force-on-force scenarios to validate training

Instructors: Dan Butler is the owner of Paladin Tactical US, LLC. Brian Jones is the owner of Pinnacle Tactical Solutions. Both Dan and Brian served as FBI SWAT Senior Team Leaders and provided instruction in firearms and tactics to local and federal law enforcement officers over the last 20 years.
