First Responder Sonar Training

You're invited to attend a FREE training event to improve your knowledge and ability in Side Scan Sonar Imaging.

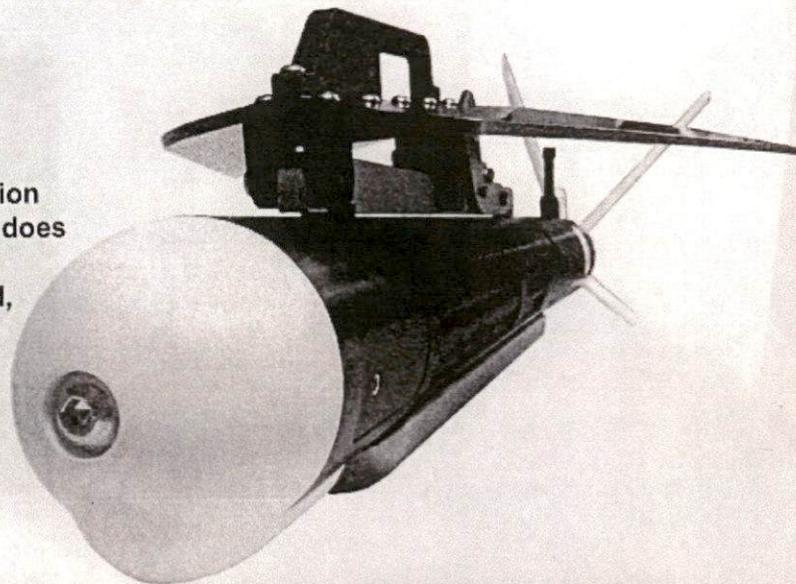

November 2nd & 3rd
Sacramento County
Sheriffs' Association
640 Bercut Drive
Sacramento, CA 95811

Marine Sonic Technology, in conjunction with Sacramento Sheriff's Office, are providing a FREE training event in your region to expand the knowledge of Side Scan Sonar and underwater imaging techniques for towed and hull mounted systems.

Training Topics:

- What is Side Scan Sonar
- Terminology
- The Acoustic Collection Process
- Frequency, Range, and Depth Selection
- NaDir Process, what it is and what it does
- Image collection and processing
- Principles of Sound, Speed of Sound, Density and Reflection
- Frequency, reaction with objects
- Image Interpretation
- Principles of Vertical imaging
- Search patterns
- Target marking

Nov. 2nd will be classroom, for all forms of side scan sonar, from 0900-1600. Nov. 3rd will be an optional, on-the-water familiarization, for towed systems.
