Nevada City, CA, 95959

Date: 1/23/2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- AIR POLLUTION
- TOO MANY TRUCKS, ETC
- WASTE WATER ISSUES
- TOO MANY HEALTH ISSUES FOR US.
- DON'T THINK THE WORLD NEEDS MORE GOLD.

**B 223-1**

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely, Marlee Chamberlin

They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Hitler was a major reason Volkswagen got off the ground.
If the Germans looked at revitalizing things over there, they might want to focus on what works but not sentimentalize what hasn't. In other words, just because something is historic is not a reason for it to exist today.

B 233-1 Mining causes environmental damage. Right now, there's so much gold above ground they store giant bars of it in vaults. We don't need to "generate wealth" by pulling more gold out of the ground at the cost of environmental damage, proven risk to groundwater, ~~and~~ noise, and other palpable ills. Lets focus on creating wealth in a way that helps people

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Response 1. Economic concerns are outside the scope of CEQA – Please see Master Response 2. With regard to concerns about the Project Applicant, the commenter is referred to Master Response 3 - Operator Responsibility.

**Form Letter B 239**

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

January 17, 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, Mike Stolla, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 239-1

- Mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust, including asbestos, will drift downwind into Grass Valley.
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts of diesel exhaust will be produced from continuous operation, including the trucking in of explosives.
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential).
- Crushing of 1,500 tons of mine waste rock every day, all day, using massive machines.
- Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area (see map).
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells.
- Waste water will be dumped into South Fork Wolf Creek, destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems.
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- The Rise Gold CEO already has numerous violations of mining and environmental laws.
- Claims that a few hundred jobs cannot justify the likelihood of increased lung cancer in Nevada County.
- Nevada County currently has a surplus of unfilled job positions.
- Business that depends on tourism will be hurt.
- Homeowners can lose an estimated 20% in their property values and more if the wells are dry.
- A working mine will shatter the peace and quiet of many neighborhoods.
- Underground blasting is planned for 7 days a week and will be felt by those living above the 2,585 acres of mine underground mineral rights -- see map!
- While Rise Gold shareholders profit, the local community gets little revenue.
- The relatively few theoretical jobs gained will not offset the harm done.
- Where will the imported workers live when housing is so limited in our area?
- An estimated 85% of vendor spending will not be local (explosives, chemicals, concrete, steel...).
- Nevada County revenue will be from ordinary property taxes, not from gold.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has put forth to weaken and override opposition from the local population.

Sincerely,

Michael P. Stolla

Date: February 22, 2022

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

I do not trust them. Look at their history, which I believe you must have done yourselves. They pollute and leave a disaster. Let's find other industries to boost our economy. We've already driven out prior businesses, and we've done little to entice anyone to replace them.

There are many reasons this mine should NOT be reopened. My personal reasons are:

**B 245-1**

· The mine will pollute our air and increase lung disease.

· Clouds of airborne toxic mining dust including asbestos will drift downwind into Grass Valley

· If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.

· There is serious risk to our health, our environment, our property value, and our peace and quiet.

· Hard rock mining is the single largest source of toxic waste in the United States.

· Vast amounts diesel exhaust from continuous operation, including the trucking in of explosives

· A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)

· Crushing of 1,500 tons of mine waste every day, all day, using massive machines

· Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.

· Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area

· Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells

· Waste water will be dumped into South Fork Wolf Creek and destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems

· Use of over 12% of Nevada County's electricity, more than all the County businesses combined

· Numerous Rise Gold violations of mining and environmental laws in Canada and here – already

· Claims that a few hundred jobs could justify the likelihood of increased lung cancer (Nevada County currently has a surplus of unfilled job positions)

· Business life that depends on tourism will be hurt

· Homeowners stand to lose an estimated 20% in property values (and more if the well is dry)

· A working mine will damage neighborhoods with shattered peace and quiet

· Underground blasting is planned for seven days a week and will be felt by those living within the 2,585 acres of underground mineral rights the mine owns. See map!

· While Rise Gold shareholders (largely Canadian) profit, the local community gets little.

· The few theoretical jobs gained are hugely offset by the harm done. And there are several excellent suggestions in the Union to promote good jobs locally.

· Where will the imported workers live when housing is already so limited in our area?

· 85% of vendor spending will not be local

· Nevada County revenue will be only from property taxes, all other taxes will go to the state

· The history and business practices of Rise Gold do not inspire trust

· Rise Gold has never opened a hard rock mine and has never made a profit on their business ventures to date

· Rise Gold CEO, Ben Mossman has been charged with environmental offenses in B.C. Canada courts

· There are many questions as to the financial stability of this company.

· The potential "breakout" from the mine's contaminated settling pond during one of our "atmospheric river" storms is enormous.

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock:

I am a tax-paying resident of Nevada County. I am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and local businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- Negative Impact on local water supply
- Negative Impact on local air quality
- Negative impact on my property value in Grass Valley
- Negative impact on local roads from increased truck traffic
- Negative impact on quality of life in Grass Valley
- Not a good use of County or public resources

**B 247-1**

I believe that Rise Gold Corporation lacks the resources and will to mitigate the impact of their mine project on the environment and the people of Grass Valley. I hope you will join me and thousands of other local residents who are opposed to the Rise Gold Mine proposal.

Sincerely,

Nancy Jacobsen

PLANNING DEPARTMENT

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Please don't pollute our rivers!

**B 249-1**

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Nancy L. Miller

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- A working mine will shatter the peace and quiet of many neighborhoods.
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells.
- Contamination to well water and disastrous effects for ecosystems.

B 250-1

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Natalie Weaver

# The Truth about the Rise Gold Mine

**The Nevada County Board of Supervisors can vote to stop** reopening the Idaho–Maryland Gold Mine by Rise Gold Corp. a Canadian Corp. also incorporated in Nevada.

**Approval of Rise Gold Corporation's proposal will result in:**

- **A large, heavy-industry factory** on 119 acres on Brunswick Rd. in the middle of hundreds of homes (zoned residential)
- **Crushing and moving 1,500 tons of mine waste every day, all day,** using massive machines
- **Hauling trucks carrying 1,000 tons of waste rock --over 100 round trips every day** -- down Brunswick Rd. to a 56-acre location (Centennial toxic dump) less than ½ mile from downtown Grass Valley, piling it higher than a 6-story building
- **Trucks and heavy machinery will produce diesel exhaust from continuous operation**
- **Clouds of mining dust including asbestos** can move over Grass Valley from digging and dumping 1,500 tons of contaminated landfill a day
- **Blasting, earth-shaking explosions** 7 days a week in the tunnels under 2,585 acres of the Grass Valley area (including the Hospital) that can be felt inside homes
- **Over 3.5 million gallons per day to start and then 1.2 million gallons per day of waste mine water** pumped into Wolf Creek then to Bear River for the next "80 years"
- **12% of Nevada County's electricity will be taken by the Mine, more than all the County businesses combined**

**What impacts are predicted if the Mine is approved?**

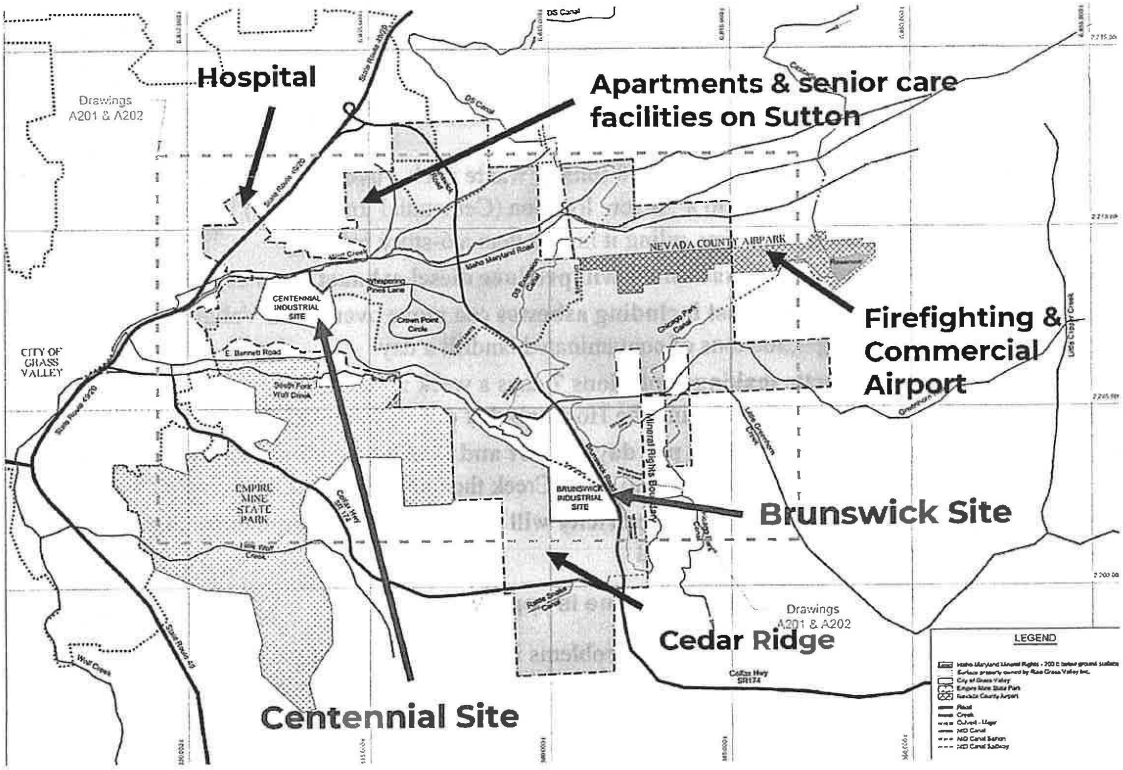
**Air pollution will** worsen respiratory problems in Grass Valley **and probably increase the death rate** in Western Nevada County (expert conclusion), especially among the most vulnerable such as the elderly (over 7 hospital & senior care facilities are near the Centennial dump site). (https://www.minewatchnc.org/post/dr-newsom-on-health-risks-of-mine)

**The South Fork of Wolf Creek will likely have stirred up mercury, toxic chemical residues (like cyanide & lead), and serious erosion.**

**Real-estate value in the vicinity will drop more than 20%** (Realtors' estimate in the Union).

**Loss or damage to hundreds of homeowners' wells likely from mine dewatering.**

**Few local jobs and little tax revenue.** See Martin Webb at Minewatchnc.org and *Rise Gold Project Description* p.26 (mynevadacounty.com)



**Inadequate regulation** because there are not enough government personnel. Based on history, the fixes for damages will not be enforced (https://www.minewatchnc.org/post/no-state-monitor-for-mine). Legal charges against Rise Mine Corp. in Canada for failure to clean up their toxic sites are pending in court.

# The Truth about the Rise Gold Mine

Dozens of residents contributed to this including the ***Elders Action Network.***

**Over 3000 citizens have filled in the petition at** www.MineWatchnc.org

Rise Mine plans map: (Brunswick Site=115 acre industrial center; Centenial=toxic waste dump)

* Grey area is where they can tunnel and blast (mining rights)

Nevada City, CA, 95959

Date: 16 Feb 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

**B 262-1**

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Pauline Marie

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 264-1 there are currently 3 new large housing developments being constructed in Grass Valley of over 300 new homes adding close to twice that many new cars, adding to the already difficult traffic situation in town. If this mine project expects to bring 300 new jobs for people from out of town then that will bring in hundreds of more vehicles. This doesn't account for the drastic increase in trucking the waste rock through the basin. And also this company is not TRUSTWORTHY

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

**Form Letter B 267**

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 4/4/2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- The mine will pollute our air and increase lung disease.
- Clouds of airborne toxic mining dust including asbestos will drift downwind into Grass Valley
- If approved, this mine would operate 24 hours a day, 7 days a week, for up to 80 years.
- There is serious risk to our health, our environment, our property value, and our peace and quiet.
- Hard rock mining is the single largest source of toxic waste in the United States.
- Vast amounts diesel exhaust from continuous operation, including the trucking in of explosives
- A large factory on Brunswick Rd. is in the middle of hundreds of family homes (zoned residential)

**B 267-1**

- Crushing of 1,500 tons of mine waste every day, all day, using massive machines
- Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Road, piling it higher than a 6-story building at the Centennial site.
- Blasting 7 days a week in the tunnels under 2,585 acres of the Grass Valley area
- Removal of 1 million to 3 million gallons of contaminated water per day for the next 80 years, dewatering hundreds of wells
- Waste water will be dumped into South Fork Wolf Creek and destroy habitats and stir up existing toxic residues like mercury, cyanide and lead with disastrous effects for downstream ecosystems
- Use of over 12% of Nevada County's electricity, more than all the County businesses combined
- Numerous Rise Gold violations of mining and environmental laws in Canada and here – already
- Claims that a few hundred jobs could justify the likelihood of increased lung cancer (Nevada County currently has a surplus of unfilled job positions)
- Business life that depends on tourism will be hurt

- Homeowners stand to lose an estimated 20% in property values (and more if the well is dry)
- A working mine will damage neighborhoods with shattered peace and quiet
- Underground blasting is planned for seven days a week and will be felt by those living within the 2,585 acres of underground mineral rights the mine owns. See map!
- While Rise Gold shareholders (largely Canadian) profit, the local community gets little.
- The few theoretical jobs gained are hugely offset by the harm done. And there are several excellent suggestions in the Union to promote good jobs locally.
- Where will the imported workers live when housing is already so limited in our area?
- 85% of vendor spending will not be local
- Nevada County revenue will be only from property taxes, all other taxes will go to the state
- The history and business practices of Rise Gold do not inspire trust
- Rise Gold has never opened a hard rock mine and has never made a profit on their business ventures to date
- Rise Gold CEO, Ben Mossman has been charged with environmental offenses in B.C. Canada courts
- There are many questions as to the financial stability of this company.
- The potential "breakout" from the mine's contaminated settling pond during one of our "atmospheric river" storms is enormous.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

Water Pollution
Wells
Noise
Environmental waste
traffic
Air pollution

**B 275-1**

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Name: Robert Trent

Address: 512 Jordan St

NEVADA COUNTY
BOARD OF SUPERVISORS

Nevada County Board of Supervisors
950 Maidu Avenue, Suite 200
Nevada City, CA, 95959

Date: January-19-2022

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

As a homeowner, according to a study by local realtors, my property can loose an estimated 20% in property values if the mine is opened due to the effects on the environment; air pollution and cancer risk due to toxic particles being released into the air, water pollution, traffic in Grass Valley, and excess noise. This will deter people from moving here for retirement.

I live close to Hwy 49 in Berriman Ranch and would have to put up with the noise of a constant convoy of trucks hauling loads for processing out of town down Hwy 49 night and day.

**B 277-1**

Nearby Wolf Creek that my family recreates at, would be flooded with mine waste water and stir up toxic residues that will harm the environment.

Businesses and the local economy that depend on tourism will be hurt when our bucolic Sierra Foothill community is reduced to an industrial site.

If approved, the mine will operate 24 hours a day, 7 days a week, for up to 80 years.There is serious risk to our health, our environment, our property values, and our peace and quiet.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 279-1

Rise Gold has a history of destructive environmental disasters that they have failed to clean up. Even if Rise is able to break their historical chain of environmental destruction. business as anticipated will be destructive and disruptive. Hard rock mining releases substantial levels of toxic materials into the air and water including asbestos, Mercury, cyanide and lead. Waste water will be dumped into our rivers and asbestos into our air. Rise will operate 24/7. heavily laden trucks will pollute our town and ruin our roads. Please Reject Rise Gold.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 281-1

I strongly oppose the mine. Given the climate issues and the stress on the planet, I believe there is no way to predict the effect of the mine, the underground tunnels and continuous digging will have on our community and its inhabitants

I am a member of the local faith-based organization, the Unitarian Universalist Community of the Mountains. Our mission calls us "to use our human, spiritual and financial resources to make a difference in our local community and the world." Rise Gold has demonstrated disrespect for the environment and the people of Grass Valley, for example, their unrepresentative survey. Stopping Rise Gold would make a huge difference for all of us. I hope you will be among those who will be known to have stood against the well-funded deception Rise Gold Mine has developed.

Sincerely,

# The Truth about the Rise Gold Mine

**The Nevada County Board of Supervisors can vote to stop** reopening the Idaho–Maryland Gold Mine by Rise Gold Corp. a Canadian Corp. also incorporated in Nevada.

**Approval of Rise Gold Corporation's proposal will result in:**

- **A large, heavy-industry factory** on 119 acres on Brunswick Rd. in the middle of hundreds of homes (zoned residential)
- **Crushing and moving 1,500 tons of mine waste every day, all day,** using massive machines
- **Hauling trucks carrying 1,000 tons of waste rock --over 100 round trips every day –** down Brunswick Rd. to a 56-acre location (Centennial toxic dump) less than ½ mile from downtown Grass Valley, piling it higher than a 6-story building
- **Trucks and heavy machinery will produce diesel exhaust from continuous operation**
- **Clouds of mining dust including asbestos** can move over Grass Valley from digging and dumping 1,500 tons of contaminated landfill a day
- **Blasting, earth-shaking explosions** 7 days a week in the tunnels under 2,585 acres of the Grass Valley area (including the Hospital) that can be felt inside homes
- **Over 3.5 million gallons per day to start and then 1.2 million gallons per day of waste mine water** pumped into Wolf Creek then to Bear River for the next "80 years"
- **12% of Nevada County's electricity will be taken by the Mine, more than all the County businesses combined**

**What impacts are predicted if the Mine is approved?**

**Air pollution will** worsen respiratory problems in Grass Valley **and probably increase the death rate** in Western Nevada County (expert conclusion), especially among the most vulnerable such as the elderly (over 7 hospital & senior care facilities are near the Centennial dump site). (https://www.minewatchnc.org/post/dr-newsom-on-health-risks-of-mine)

**The South Fork of Wolf Creek will likely have stirred up mercury, toxic chemical residues (like cyanide & lead), and serious erosion.**

**Real-estate value in the vicinity will drop more than 20%** (Realtors' estimate in the Union).

**Loss or damage to hundreds of homeowners' wells likely from mine dewatering.**

**Few local jobs and little tax revenue.** See Martin Webb at Minewatchnc.org and *Rise Gold Project Description* p.26 (mynevadacounty.com)

**Inadequate regulation** because there are not enough government personnel. Based on history, the fixes for damages will not be enforced (https://www.minewatchnc.org/post/no-state-monitor-for-mine). Legal charges against Rise Mine Corp. in Canada for failure to clean up their toxic sites are pending in court.

## FORM LETTER B 284: SANDRA BURKE

### Response to Comment B 284-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Responses 1 and 3.

Regarding concerns about water supply, water quality, and drought, please see Chapter 4.8 of the DEIR, Master Response 14 - Adequacy of Groundwater Model, Master Response 15 - Adequacy of Groundwater Monitoring Wells, Master Response 16 – Drought and Climate Change, and Master Response 35 – Discharge to South Fork Wolf Creek. Regarding concerns related to increased traffic on local roadways, please refer to Chapter 4.12, Transportation, of the DEIR. Regarding concerns about air pollution, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR.

**Form Letter B 285**

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: February 25, 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading, and manipulative. Their untruthful "poll" of our sample citizenry, complete with prevarications of support for the mine, have been an affront, plastered on the back page of the Union. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

The mine will pollute our air due to toxic mining dust, including asbestos, which will increase lung disease. There will be massive amounts of diesel exhaust produced from the continuous movement of trucks hauling waste rock making over 100 trips per day. There is also the possibility of dewatering wells for residences near the site.

**B 285-1**

Rise Gold CEO, Ben Mossman has been charged with an environmental disaster in British Columbia, Canada. He was involved in a corporation called Banks Island Gold, Ltd. The mine had so many non-compliance and safety issues that it was ordered closed by the British Columbia government. It went into bankruptcy and the province has a huge environmental waste site to clean up at taxpayers expense. Besides this there are numerous questions about the financial stability of this company.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has put forth to weaken and override opposition from the local population.

Sincerely,

Sandra H. Yanko

## FORM LETTER B 286: SANDRA YANKO

### Response to Comment B 286-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Response 1. With regard to concerns about the Project Applicant, the commenter is referred to Master Response 3 - Operator Responsibility.

Regarding air pollution, including toxic air contaminants such as asbestos and diesel exhaust, as well as electricity consumption, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR. With respect to concerns regarding effects on nearby wells, please see Master Response 14 - Adequacy of Groundwater Model and Master Response 15 - Adequacy of Groundwater Monitoring Wells.

NEVADA COUNTY
BOARD OF SUPERVISORS

Date: 3/9/22

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- THE EFFECTS ON OUR WATER RESOURCES ARE SERIOUSLY UNDERESTIMATED. THE IMPACT ON WELLS & AQUIFERS IS DIFFICULT TO ESTIMATE DUE TO MINES, FISSURES & CRACKS UNDER THE COUNTY.
- TOURISTS & RESIDENTS WILL LEAVE THE COUNTY DUE TO NOISE, DRY WELLS & TRAFFIC.
- MOSSMAN IS A BAD FINANCIAL RISK. HE'LL LEAVE THE COUNTY WITH AN ENVIRONMENTAL DISASTER WHICH WILL TAKE DECADES TO REMEDIATE.
- 300 SUPPOSED JOBS IS NOT WORTH THE DISASTER THE MINE WILL CAUSE.

B 287-1

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Sandy Pack

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

- THE EFFECTS ON OUR WATER RESOURCES CANNOT BE PREDICTED DUE TO THE MINES CRACKS & FISSURES THAT ARE INTERCONNECTED.
- MOSSMAN HAS A VERY POOR FINANCIAL REPUTATION AND A VERY BAD ENVIRONMENTAL RECORD. WE'LL BE CLEANING UP HIS MESSES FOR DECADES.
- EFFECTS ON THE ENVIRONMENT OF HUGE TAILINGS PILES IS WILDLY UNDERESTIMATED IN THE DEIS.

B 288-1

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Sandy Pack

**Form Letter B 298**

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 2-16-2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

pumping millions of cubic feet of ground water, danger all residential wells, especially during current drought situation.

The mine will pollute our air and increase lung disease. Create toxic mining dust, including asbestos into our community
Cause serious issues to our health, environment, and property values.
Hard rock mining is the single largest source of toxic waste in the U.S. Trucking dangerous explosives.
The Brunswick location is in the middle of family homes zoned residential.
Tons of waste rock, down Brunswick Road, with it going to the Centennial site.
Blasting full time in tunnel under over 2,500 acres of Grass Valley area.
Removal of millions of gallons of contaminated water every day, dewatering hundreds of local citizens wells.
Waste water dumped into Wolf Creek, destroying habitats. Toxic residues like mercury, cyanide, and lead with disastrous effects.
The Rise CEO has history of violations of mining and environmental laws.
Number of possible jobs added, does not justify the potential damage noted above.
B 298-1 Tourism will be hurt, based on the potential damage noted above. If citizens' wells dry up, property value is gone.
The local community get minimal benefit, rather only the Rise Gold shareholder benefit.
History of Rise Gold, and its CEO show environmental violations, no trust for the company, has no history of profits in its prior ventures.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

The mine will pollute our air and increase lung disease.
Create toxic mining dust, including asbestos into our community
Cause serious issues to our health, environment, and property values.
Hard rock mining is the single largest source of toxic waste in the U.S.
Trucking dangerous explosives.
The Brunswick location is in the middle of family homes zoned residential.
Tons of waste rock, down Brunswick Road, with it going to the Centennial site.
Blasting full time in tunnel under over 2,500 acres of Grass Valley area.
Removal of millions of gallons of contaminated water every day, dewatering hundreds of local citizens wells.
Waste water dumped into Wolf Creek, destroying habitats. Toxic residues like mercury, cyanide, and lead with disastrous effects.
The Rise CEO has history of violations of mining and environmental laws.
Number of possible jobs added, does not justify the potential damage noted above.
Tourism will be hurt, based on the potential damage noted above.
If citizens' wells dry up, property value is gone.
The local community get minimal benefit, rather only the Rise Gold shareholder benefit.
History of Rise Gold, and its CEO show environmental violations, no trust for the company, has no history of profits in its prior ventures.

B 299-1

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely, Shirley Fenicle

### Response to Comment B 299-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Response 1. Property values and quality of life concerns are outside the scope of CEQA – Please see Master Response 2. With regard to concerns about the Project Applicant, the commenter is referred to Master Response 3 - Operator Responsibility.

With respect to concerns regarding effects on nearby wells and drought, please see Chapter 4.8 of the DEIR, Master Response 14 - Adequacy of Groundwater Model, Master Response 15 - Adequacy of Groundwater Monitoring Wells, and Master Response 16 – Drought and Climate Change. Regarding air pollution, including toxic air contaminants such as asbestos and diesel exhaust, as well as electricity consumption, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR. Regarding toxic waste, please see Master Response 8 - Mine Waste Characterization. Regarding effects to Wolf Creek, please see Master Response 35 - Discharge to South Fork Wolf Creek and Master Response 36 – Flows in South Fork Wolf Creek.

Nevada County Board of Supervisors
950 Maidu Avenue, Suite 200
Nevada City, CA, 95959

Date:

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 300-1

Environmentally, the whole mine idea simply stinks! Our water and air health are far more valuable to our community than any "profit" which might (but probably wouldn't) occur. It's time to think about a healthy plan for our beautiful community.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Shirley Osgood

Susan Joanne
c/o 2036 Nevada City Highway, #44
Grass Valley, California [95945]

February 18, 2022

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA 95959

Dear Commissioners: Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato, and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find that Rise Gold to be inconsistent, misleading, and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

The main mine access and processing facilities will be located at the 119-acre New Brunswick site located at the corner of Brunswick and East Bennett Roads. Operations will also utilize the 56-acre Centennial site on Idaho-Maryland Road west of Centennial Drive to dispose of mine-waste.

B 310-1

**Mining will take place 24 hours a day, 7 days a week.** About 1500 tons of waste rock and tailings will be removed from the mine daily. Of this, 500 tons per day will be mixed with cement to form a paste backfill and re-deposited into the mine. The remaining 1000 tons per day will be deposited at the Centennial site and at a 31-acre area along Brunswick Road just south of the processing facility and bounded by neighborhoods on Cedar Ridge Drive, Elk Lane, and Mink Court.

Waste rock and tailings from the mine will be **transported by trucks making up to 100 round trips per day, 16 hours per day, 7 days per week**. To get to the Centennial site, they will turn left onto Brunswick Road about 0.4 miles south of East Bennett Rd, pass through the intersection of East Bennett and Brunswick and turn left onto Whispering Pines Lane to reach Centennial Drive.

At the Centennial site, an area of **44 acres will be built up with "engineered fill" to depths of up to 70 feet**, eventually forming a 37-acre graded surface that may be utilized for future development. Similarly, the mine waste dumped at the Brunswick Road site will eventually cover an area of **31 acres and be built up as much as 90 feet** to form a 21-acre graded area for possible future industrial uses.

The trucks will be loaded with rock with a front-end loader. **Hauling will take place 6:00 AM – 10:00 PM, 7 days a week.** After the rock is dumped, it will be **graded and compacted 7:00 AM – 3:30 PM, 7 days a week, using bulldozers, graders, and rolling**

**compactors. This activity will take place continuously for 11 years** or until both build-up areas are maximized. After that, mine waste materials will have to be hauled out via Brunswick Road to Glenbrook Basin in order to access Hwy 49 for transport to sites not yet identified.

In terms of energy use, the permit application estimates a PG&E power net load of 6000 Kilowatts (KW). Planned diesel backup power generation capacity is 6000 KW. Electricity utilization is estimated at 42,757,000 Kilowatt-Hours (KWH) per year. This is equivalent to the electric use of about 5000 houses.

Full operations of the mine, including fuel for equipment, electricity, and other operational uses are estimated to produce around 9,000 metric tons of greenhouse gas emissions per year.

Cement, explosives, diesel, and various other chemicals will be regularly transported to the site and stored. Cement will be mixed with tailings and pumped back underground and used to backfill mining voids. By one estimate, the backfill paste will use approximately 25 tons of cement daily. Explosives will include ANFO (Ammonium Nitrate and Fuel Oil), and Ammonium Nitrate Emulsion. Up to 28,000 lbs. of explosives will be stored onsite underground. Diesel fuel storage will consist of a 30,000-gallon aboveground storage tank. A number of other chemicals will be utilized for processing the gold using the sulfide flotation system and other activities.

Industrial buildings covering 122,000 square feet are proposed for the New Brunswick site. Noteworthy among these would be the gold processing plant with dimensions of 425 feet by 70 feet and 65 feet high, and the shaft headframe building with a height of 165 feet. Running between these buildings will be a 365' long enclosed conveyor system. Tailings will be stockpiled onsite while waiting for transport.

The application to re-operate the Idaho-Maryland mine states that 312 jobs would be created by the mine operations. Of those jobs, 242 jobs are specialized technical positions likely taken by people recruited from outside the area. The remaining jobs, truck transport of mine waste, and mineral processing, could provide 70 jobs for current local residents.

I want no part of any of this in my community. PERIOD!

I live on the land at Nevada County and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Susan Joanne

To get to the Centennial site, they will turn left onto Brunswick Road about 0.4 miles south of East Bennett Rd, pass through the intersection of East Bennett and Brunswick and turn left onto Whispering Pines Lane to reach Centennial Drive.

At the Centennial site, an area of **44 acres will be built up with "engineered fill" to depths of up to 70 feet**, eventually forming a 37-acre graded surface that may be utilized for future development. Similarly, the mine waste dumped at the Brunswick Road site will eventually cover an area of **31 acres and be built up as much as 90 feet** to form a 21-acre graded area for possible future industrial uses.

The trucks will be loaded with rock with a front-end loader. **Hauling will take place 6:00 AM – 10:00 PM, 7 days a week.** After the rock is dumped, it will be **graded and compacted 7:00 AM – 3:30 PM, 7 days a week, using bulldozers, graders, and rolling**

**compactors. This activity will take place continuously for 11 years** or until both build-up areas are maximized. After that, mine waste materials will have to be hauled out via Brunswick Road to Glenbrook Basin in order to access Hwy 49 for transport to sites not yet identified.

In terms of energy use, the permit application estimates a PG&E power net load of 6000 Kilowatts (KW). Planned diesel backup power generation capacity is 6000 KW. Electricity utilization is estimated at 42,757,000 Kilowatt-Hours (KWH) per year. This is equivalent to the electric use of about 5000 houses.

Full operations of the mine, including fuel for equipment, electricity, and other operational uses are estimated to produce around 9,000 metric tons of greenhouse gas emissions per year.

Cement, explosives, diesel, and various other chemicals will be regularly transported to the site and stored. Cement will be mixed with tailings and pumped back underground and used to backfill mining voids. By one estimate, the backfill paste will use approximately 25 tons of cement daily. Explosives will include ANFO (Ammonium Nitrate and Fuel Oil), and Ammonium Nitrate Emulsion. Up to 28,000 lbs. of explosives will be stored onsite underground. Diesel fuel storage will consist of a 30,000-gallon aboveground storage tank. A number of other chemicals will be utilized for processing the gold using the sulfide flotation system and other activities.

Industrial buildings covering 122,000 square feet are proposed for the New Brunswick site. Noteworthy among these would be the gold processing plant with dimensions of 425 feet by 70 feet and 65 feet high, and the shaft headframe building with a height of 165 feet. Running between these buildings will be a 365' long enclosed conveyor system. Tailings will be stockpiled onsite while waiting for transport.

The application to re-operate the Idaho-Maryland mine states that 312 jobs would be created by the mine operations. Of those jobs, 242 jobs are specialized technical positions likely taken by people recruited from outside the area. The remaining jobs, truck transport of mine waste, and mineral processing, could provide 70 jobs for current local residents.

I want no part of any of this in my community. PERIOD!

I live on the land at Nevada County and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

Susan Joanne

Grass Valley, California [95945]

February 18, 2022

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA 95959

Dear Commissioners: Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato, and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find that Rise Gold to be inconsistent, misleading, and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

**B 312-1**

The main mine access and processing facilities will be located at the 119-acre New Brunswick site located at the corner of Brunswick and East Bennett Roads. Operations will also utilize the 56-acre Centennial site on Idaho-Maryland Road west of Centennial Drive to dispose of mine-waste.

**Mining will take place 24 hours a day, 7 days a week.** About 1500 tons of waste rock and tailings will be removed from the mine daily. Of this, 500 tons per day will be mixed with cement to form a paste backfill and re-deposited into the mine. The remaining 1000 tons per day will be deposited at the Centennial site and at a 31-acre area along Brunswick Road just south of the processing facility and bounded by neighborhoods on Cedar Ridge Drive, Elk Lane, and Mink Court.

Waste rock and tailings from the mine will be **transported by trucks making up to 100 round trips per day, 16 hours per day, 7 days per week**. To get to the Centennial site, they will turn left onto Brunswick Road about 0.4 miles south of East Bennett Rd, pass through the intersection of East Bennett and Brunswick and turn left onto Whispering Pines Lane to reach Centennial Drive.

At the Centennial site, an area of **44 acres will be built up with "engineered fill" to depths of up to 70 feet**, eventually forming a 37-acre graded surface that may be utilized for future development. Similarly, the mine waste dumped at the Brunswick Road site will eventually cover an area of **31 acres and be built up as much as 90 feet** to form a 21-acre graded area for possible future industrial uses.

The trucks will be loaded with rock with a front-end loader. **Hauling will take place 6:00 AM – 10:00 PM, 7 days a week.** After the rock is dumped, it will be **graded and compacted 7:00 AM – 3:30 PM, 7 days a week, using bulldozers, graders, and rolling**

**compactors. This activity will take place continuously for 11 years** or until both build-up areas are maximized. After that, mine waste materials will have to be hauled out via Brunswick Road to Glenbrook Basin in order to access Hwy 49 for transport to sites not yet identified.

They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 317-1

The mine will pollute our air and increase lung disease.
Trucks hauling 1,000 tons of waste rock, 100 trips every day, down Brunswick Rd., piling it higher than a 6-story building on the Centennial site,
Waste water will be dumped into the South Fork of Wolf Creek, destroying habitats and storing up existing toxic residues.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 320-1

There is SERIOUS RISK to our health, environment, our property values, and to our peace and quiet. Hard Rock mining is the single largest source of toxic waste in the US. Mining has never been a "clean business" and it never will. Waste water will destroy habitats and stir up existing toxic residue leading to disastrous effects for downstream ecosystems. Rise Gold CEO team has proven themselves to be untrustworthy. Nevada City and Grass Valley may NEVER recover fully from the harmful effects of reopening this mine!

I am resident of Nevada County and observe that Rise Gold corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Responses 1, 2, and 3.

**Form Letter B 321**

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 03/14/22

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 321-1

Nevada City and Grass Valley may NEVER recover from the overall harmful effects the reopening of Rise Gold likely will have on the area. There is too great a risk to our health, environment, our property values and to our peace of mind and quiet. Hard rock mining is the single largest source of toxic waste in the U.S. Mining has never been a "clean" business and never will be. Waste water will destroy habitats and stir up existing toxic residue resulting in disastrous effects for downstream ecosystems. The Rise Gold CEO team has proven themselves to be untrustworthy.

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely, Tara Kelly

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

1) The number and load of trucks each day will deteriorate the local roads to the point of needed repaving each year.

2) The noise associated with mining will impact those residences adjacent to the mining operations.

3) The quality of the air will decrease due to increased emissions from mining equipment and increased truck loads.

**B 326-1**

4) The vast majority of the residents in this county do not want a mining operation within the sphere of influence of Grass Valley and/or Nevada City

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 329-1 that I am very concerned about the impact on the environment: water use, toxins released during the extrapolation of gold process, toxins trucked in, traffic pollution, noise pollution.

I am a member of the local faith-based organization, the Unitarian Universalist Community of the Mountains. Our values call us to use our human, spiritual and financial resources to make a difference in our local community and the world. Rise Gold has demonstrated disrespect for the environment and the people of Grass Valley, for example, their unrepresentative survey. Stopping Rise Gold would make a huge difference for all of us.

I hope you will be among those who will be known to have stood against the well-funded deception Rise Gold Mine has developed.

## FORM LETTER B 335: WALT FROLOFF

### Response to Comment B 335-1

The commenter expresses general concerns regarding the project but does not specifically address the adequacy of the DEIR. Thus, a detailed response is neither possible nor required. Please see Master Responses 1 and 3.

Regarding increased truck traffic, please refer to Chapter 4.12, Transportation, of the DEIR.

**Form Letter B 336**

RECEIVED

Nevada County Board of Supervisors
950 Maidu Avenue, Suite 200
Nevada City, CA, 95959

JAN 24 2022
NEVADA COUNTY
BOARD OF SUPERVISORS

Date: 1/20/22

Dear Supervisors Heidi Hall, Ed Scofield, Dan Miller, Susan Hoek, and Hardy Bullock,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Environmental Impact Report and subsequently voting to approve or not approve the project. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

B 336-1

1) detrimental to health
2) crushing, blasting, work noise.
3) increased traffic
4) disturbed peace + quiet.

I am resident of Nevada County and observe that Rise Gold Corporation lacks respect for the impact of their mine project on the environment and the people of Grass Valley. I hope you will be among those who will be known to have opposed the well-funded deception Rise Gold Mine has developed.

Sincerely,

Name: Walt Faloft

Address: 516 Temby St, Grass Valley

Phone number: 831 251 0202

**Form Letter B 337**

Nevada County Planning Commission
950 Maidu Avenue, Suite 170
Nevada City, CA, 95959

Date: 12 FEBRUARY 2022

Dear Commissioners Danny Milman, Laura Duncan, Robert Ingram, Mike Mastrodonato and William Greeno,

I, the undersigned, am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corporation. I understand that you will be reviewing the Draft Environmental Impact Report and advising Nevada County's Board of Supervisors before they vote on the matter. I have listened to both sides of the argument and find Rise Gold Mine to be inconsistent, misleading and manipulative. They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.

There are many reasons this mine should NOT be reopened. My personal reasons are:

THE MANY CONSCIENTIOUS AND INTELLIGENT REASONS FOR NOT PERMITTING THE REOPENING OF LARGE SCALE MINING SHOULD BE SELF EVIDENT. IF CREATING NEW JOBS IS AN ISSUE, LET THE SOLUTIONS COME FROM EARTH REGENERATIVE CONCERNS, RATHER THAN RAPE, PLUNDER & GREED. LESSONS UNLEARNED WILL BE REPEATED; THIS IS NOT A SACRIFICE, WE AS LOCALS, NEED TO EXPERIENCE . . . AGAIN.

**B 337-1**

I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. I'm confident that you will value my input and comments from thousands of other residents. I hope you will be among those who will be known to have stood against the well-funded deception that Rise Gold Mine has developed.

Sincerely,

They fail to adequately mitigate many significant negative impacts of this large industrial project on my family, friends, neighbors, and businesses.**

**There are many reasons this mine should NOT be reopened. My personal reasons are:**

pumping millions of cubic feet of ground water dangers residential wells. Especially in drought times

The mine will pollute our air and increase lung disease. Create toxic mining dust, including asbestos into our community
Cause serious issues to our health, environment, and property values.
Hard rock mining is the single largest source of toxic waste in the U.S. Trucking dangerous explosives.
The Brunswick location is in the middle of family homes zoned residential.
Tons of waste rock, down Brunswick Road, with it going to the Centennial site.
Blasting full time in tunnel under over 2,500 acres of Grass Valley area.
Removal of millions of gallons of contaminated water every day, dewatering hundreds of local citizens wells.
Waste water dumped into Wolf Creek, destroying habitats. Toxic residues like mercury, cyanide, and lead with disastrous effects.
The Rise CEO has history of violations of mining and environmental laws.
Number of possible jobs added, does not justify the potential damage noted above.
B 338-1 Tourism will be hurt, based on the potential damage noted above. If citizens' wells dry up, property value is gone.
The local community get minimal benefit, rather only the Rise Gold shareholder benefit.
History of Rise Gold, and its CEO show environmental violations, no trust for the company, has no history of profits in its prior ventures.

**I am a Nevada County resident and see that Rise Gold Corporation lacks concern for our environment and the people who live here. Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

**C-1-1** Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Alan Dunn

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Austin Gee

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

**C-33-1**

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Cathleen Yaksic

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

**C-51-1**

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
cindi anderson

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-70-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Darla Draper

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-90-1** Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Douglas Miller

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-112-1 Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Erin E Dunne

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Mr. Kelley,

**C-131-1**

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Grady WILSON

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Board of Supervisors County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-153-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
James Self

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-171-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Jim Schuessler

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-172-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Mr. Kelley,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-195-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,

The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Kurt Senkbeil

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-212-1** Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-230-1 Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Linda Fuentes

**C-250-1** Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Margaret Harcourt

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Mr. Kelley,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-251-1** Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-272-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Mike Wade

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Mr. Kelley,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-291-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Ricardo Fuentes

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-309-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
ROBERT SEIDLITZ

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-329-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Sherri Oakley

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Mr. Kelley,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-347-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
SUNNIE SKILES

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

C-365-1

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
Thomas D Amesbury

Re: I support the re-opening of the Idaho-Maryland Mine

Dear Planning Commissioners County,

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once in a generation opportunity to revitalize our local economy.

**C-384-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The Mine will also spur an additional 600 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Sincerely,
William Allsop

RECEIVED
MAR 23 2022
NEVADA COUNTY
BOARD OF SUPERVISORS

Date: 3-7-22

Nevada County Board of Supervisors
950 Maidu Avenue, Suite 200
Nevada City, CA, 95959

Dear Supervisors Sue Hoek, Heidi Hall, Ed Scofield, Dan Miller, and Hardy Bullock:

I work/own a business in Nevada County and I am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corp. I expect that you will be voting on the project based on the Environmental Impact Report and community input.

I have listened to both sides of the argument and find the Rise Gold Corp. (RYES) reports and advertising to be inaccurate. They fail to adequately mitigate many significant negative impacts of this large industrial project on my community and business. It is in my business and personal interest that you do not approve this project.

My business's opposition to this project is based on RYES plans, reports and the DEIR (Draft Environmental Impact Report). Experts have reported to me that there will be significant increases in air pollution, traffic in key areas, noise from both above and below ground operations, wildfire evacuation blockages, reduction of our community's water resources, etc. They also report that any economic gains do not justify the costs to the County. Adding 312 jobs to the County workforce of approximately 44,000 is trivial no matter what the wages, and well-paying jobs will not go to County residents.

**D 1-1**

Businesses depend upon a quality living experience for residents and visitors alike. I am especially concerned about tourism, likely the largest single public industry in the County. Huge diesel trucks and machines spewing exhaust and using key access roads to Grass Valley are not going to improve our vital image as a tourist destination.

Many tourists come here for the outdoors, art, food and wine, and live performances. Please do not permit the County's attractive environment to be damaged by air and noise pollution, a large factory, waste dumps, and industrial traffic.

Sincerely,

### Response to Comment D 1-1

Please see Master Response 1 regarding non-EIR issues, Master Response 2 regarding social and economic impacts, Master Response 5 regarding evacuation zones, Master Response 6 regarding wildfire impacts, Master Response 14 regarding adequacy of the groundwater model, and Master Response 15 regarding adequacy of the groundwater monitoring and mitigation.

In addition, with regard to air quality impacts, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR, which provides a detailed analysis of air quality impacts associated with the proposed project.

With regard to noise, please refer to Impacts 4.10-1 through 4.10-3 in Chapter 4.10, Noise and Vibration, of the DEIR, which provide a detailed analysis of whether the project would result in the generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. Impact 4.10-4 in Chapter 4.10, Noise and Vibration, of the DEIR, provides a detailed analysis of whether the project would generate excessive groundbourne vibration or groundborne noise levels.

Furthermore, please refer to Chapter 4.12, Transportation, of the DEIR, for a detailed analysis of the project's transportation effects on the surrounding roadway system.

Adding 312 jobs to the County workforce of approximately 44,000 is trivial no matter what the wages, and well-paying jobs will not go to County residents.

D 6-1

Businesses depend upon a quality living experience for residents and visitors alike. I am especially concerned about tourism, likely the largest single public industry in the County. Huge diesel trucks and machines spewing exhaust and using key access roads to Grass Valley are not going to improve our vital image as a tourist destination.

Many tourists come here for the outdoors, art, food and wine, and live performances. Please do not permit the County's attractive environment to be damaged by air and noise pollution, a large factory, waste dumps, and industrial traffic.

Sincerely,

### Response to Comment D 6-1

Please see Master Response 1 regarding non-EIR issues, Master Response 2 regarding social and economic impacts, Master Response 5 regarding evacuation zones, Master Response 6 regarding wildfire impacts, Master Response 14 regarding adequacy of the groundwater model, and Master Response 15 regarding adequacy of the groundwater monitoring and mitigation.

In addition, with regard to air quality impacts, please refer to Chapter 4.3, Air Quality, Greenhouse Gas Emissions, and Energy, of the DEIR, which provides a detailed analysis of air quality impacts associated with the proposed project.

With regard to noise, please refer to Impacts 4.10-1 through 4.10-3 in Chapter 4.10, Noise and Vibration, of the DEIR, which provide a detailed analysis of whether the project would result in the generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. Impact 4.10-4 in Chapter 4.10, Noise and Vibration, of the DEIR, provides a detailed analysis of whether the project would generate excessive groundbourne vibration or groundborne noise levels.

Furthermore, please refer to Chapter 4.12, Transportation, of the DEIR, for a detailed analysis of the project's transportation effects on the surrounding roadway system.

BOARD OF SUPERVISORS

Date: March 7, 2022

Dear Supervisors Sue Hoek, Heidi Hall, Ed Scofield, Dan Miller, and Hardy Bullock:

I work/own a business in Nevada County and I am opposed to the reopening of the Idaho-Maryland Mine by Rise Gold Corp. I expect that you will be voting on the project based on the Environmental Impact Report and community input.

I have listened to both sides of the argument and find the Rise Gold Corp. (RYES) reports and advertising to be inaccurate. They fail to adequately mitigate many significant negative impacts of this large industrial project on my community and business. It is in my business and personal interest that you do not approve this project.

My business's opposition to this project is based on RYES plans, reports and the DEIR (Draft Environmental Impact Report). Experts have reported to me that there will be significant increases in air pollution, traffic in key areas, noise from both above and below ground operations, wildfire evacuation blockages, reduction of our community's water resources, etc. They also report that any economic gains do not justify the costs to the County. Adding 312 jobs to the County workforce of approximately 44,000 is trivial no matter what the wages, and well-paying jobs will not go to County residents.

D 7-1

Businesses depend upon a quality living experience for residents and visitors alike. I am especially concerned about tourism, likely the largest single public industry in the County. **Support Card 1**

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 1-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

**Sup-3-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 26-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 97-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 167-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 190-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine. we love gold mining in Nevada county.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 214-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

**I support re-opening the Idaho-Maryland Mine.** **Support Card 261**

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 261-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 284-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 308-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

**Sup 379-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

**Sup 425-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 449-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 472-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

**I support re-opening the Idaho-Maryland Mine**

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

**Sup 520-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

## I support re-opening the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

**Sup 543-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

**Sup 590-1**

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

**I support re-opening the Idaho-Maryland Mine**

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

**Sup 660-1**

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine

Nevada County is in tremendous need of new, well paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual salary of more than $90,000 plus benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.

## I support re-opening the Idaho-Maryland Mine.

Nevada County is in tremendous need of new, well-paying jobs that can help provide a strong economic future for today and for decades to come. Rise Grass Valley's plan to build a modern and environmentally sensitive mine that respects neighbors and our natural environment while creating over 600 new local jobs is a once-in-a-generation opportunity to revitalize our local economy.

Re-opening the mine means over 300 new employees in safe and satisfying careers with an average expected annual earnings of more than $122,000 including benefits. The mine will also spur an additional 300 jobs through related new business in the area. This project will enhance the pride and confidence of Nevada County workers and their families and help build stable and prosperous lives.

Opportunities like this come along rarely. Rise Grass Valley has a responsible, innovative project for Nevada County. I urge the Board of Supervisors and other county officials to jump start our local economy by strongly supporting the re-opening of the Idaho-Maryland Mine.
