

4. MITIGATION MONITORING AND REPORTING PROGRAM

4.1 INTRODUCTION

Section 15097 of the California Environmental Quality Act (CEQA) requires all State and local agencies to establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of either a “mitigated negative declaration” or specified environmental findings related to environmental impact reports.

The following is the Mitigation Monitoring and Reporting Program (MMRP) for the proposed project. The intent of the MMRP is to ensure implementation of the mitigation measures identified within the EIR for the proposed project. Unless otherwise noted, the cost of implementing the mitigation measures as prescribed by this MMRP shall be funded by the applicant.

4.2 COMPLIANCE CHECKLIST

The MMRP contained herein is intended to satisfy the requirements of CEQA as they relate to the EIR prepared for the proposed project. This MMRP is intended to be used by Nevada County staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation. Mitigation measures identified in this MMRP were developed in the EIR.

The EIR presents a detailed set of mitigation measures that will be implemented throughout the lifetime of the project. Mitigation is defined by CEQA Guidelines, Section 15370, as a measure that:

- Avoids the impact altogether by not taking a certain action or parts of an action;
- Minimizes impacts by limiting the degree or magnitude of the action and its implementation;
- Rectifies the impact by repairing, rehabilitating, or restoring the impacted environment;
- Reduces or eliminates the impact over time by preservation and maintenance operations during the life of the project; or
- Compensates for the impact by replacing or providing substitute resources or environments.

The intent of the MMRP is to ensure the implementation of adopted mitigation measures. The MMRP will provide for monitoring of construction activities as necessary and in-the-field identification and resolution of environmental concerns.

Monitoring and documenting the implementation of mitigation measures will be coordinated by Nevada County. The table attached to this report identifies the mitigation measures, the monitoring action for each mitigation measure, the responsible party for the monitoring action, and timing of the monitoring action. The applicant will be responsible for fully understanding and effectively implementing the mitigation measures contained within the MMRP. The County will be responsible for monitoring compliance.

4.3 MITIGATION MONITORING AND REPORTING PROGRAM

The following table indicates the mitigation measure number, the impact the measure is designed to address, the measure text, the monitoring agency, implementation schedule, and an area for sign-off indicating compliance.

The table also includes a list of the Conditions of Approval (COAs) referenced within Chapter 2, Responses to Comments, of this EIR that will be required of the proposed project, as well as the monitoring agency, implementation schedule, and an area for sign-off indicating compliance for each COA. The COAs included in this chapter are not exhaustive; a complete list of COAs will be included in the staff report prepared for the proposed project.

Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
4.1 Aesthetics					
4.1-2	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State Scenic Highway; in a non-urbanized area, substantially degrade the existing visual character or quality of public views of the site and its surroundings (public views are those that are experienced from publicly accessible vantage point) or, in an urbanized area, conflict with applicable zoning and other regulations governing scenic quality.	4.1-2 <i>In conjunction with submittal of Improvement Plans, the applicant shall submit a final Landscape Plan, prepared by a licensed landscape contractor, landscape architect, landscape designer, or horticulturist, for review and approval by the Nevada County Planning Department. The final Landscape Plan shall include the information identified in Nevada County Land Use and Development Code Sec L-II 4.2.7(E), such as:</i> <i>all details depicted on the Preliminary plans and any modifications or additions included by conditions of approval;</i> <i>location of all required plant materials, evenly dispersed within each required planting area;</i> <i>legend listing the type, number, and size of plant materials, indicating both the required number and provided number, of each plant type;</i> <i>irrigation plan;</i> <i>if existing landscaping, including native vegetation, is to be retained, a note shall be provided on the plan stating that "any existing landscaping or native vegetation shown on the approved plan for retention, that is damaged or</i>	Nevada County Planning Department	In conjunction with submittal of Improvement Plans	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>removed during construction, shall be repaired or replaced in kind with equivalent size”;</i> <i>• A Note on the Plan, certified by a Licensed Landscape Architect, Landscape Designer or Horticulturist, that trees are located on the Plan so as to cover 40% of the parking area with tree canopies within 15 years, consistent with Section 4.2.7.2.g of the Nevada County LUDC;</i> <i>• Assurance that the property owner will be responsible for the replacement of landscaping that does not survive or that deteriorates due to neglect;</i> <i>• All required trees shall be a minimum 15-gallon container size, with the trunk diameter no less than 1.5 inches for canopy trees, and 1-1.5 inches for understory trees, with the following exception: trees planting along project frontages for screening purposes shall include a mix of 15-gallon and 24-gallon trees. Shrubs shall be a minimum 5-gallon container size, and live groundcover plants shall cover bare ground.</i> <i>• Varied tree and plant materials shall be used throughout the parking lot. No one species shall comprise more than 75% of the plantings within each of the following categories: canopy tree, understory tree and</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>shrubs. Native vegetation shall be included in all required plantings unless confirmed by a licensed Landscape Architect that a native species will not satisfy a specific requirement;</i> <i>Planting areas within paved parking lots shall be separated from vehicular areas and street right-of-way by a permanently installed concrete or wooden perimeter curb at least 6" high and meet other requirements in Section 4.2.7.2.g.</i>			
4.1-4	Long-term changes in visual character associated with the proposed project in combination with cumulative development.	Implement Mitigation Measure 4.1-2.	See Mitigation Measure 4.1-2	See Mitigation Measure 4.1-2	
4.3 Air Quality, Greenhouse Gas Emissions, and Energy					
4.3-1	Conflict with or obstruct implementation of the applicable air quality plan.	4.3-1(a) <i>Prior to the initiation of construction, the following requirements shall be noted on project improvement plans. Improvements plans shall be submitted to the Nevada County Planning Department for review and approval.</i> Mitigations for Use During Construction: <i>The following measures are from the Northern Sierra Air Quality Management District and are based on the significance threshold level of emissions.</i>	Nevada County Planning Department	Prior to the initiation of construction and noted on Improvement Plans	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>For all Significance Level Thresholds (A, B, and C)</i> a. <i>Alternatives to open burning of vegetative material shall be used unless deemed infeasible by the Northern Sierra Air Quality Management District. Among suitable alternatives are chipping, mulching, or conversion to biomass fuel.</i> b. <i>Grid power shall be used (as opposed to diesel generators) for job site power needs where feasible during construction.</i> Additional Measures for Emissions at Level B Thresholds: c. <i>All controls discussed above (a and b) shall be implemented.</i> d. <i>Temporary traffic control shall be provided during all phases of the construction to improve traffic flow as deemed appropriate by the local transportation agencies and/or the California Department of Transportation.</i> e. <i>Construction activities shall be scheduled to direct traffic flow to off-peak hours as much as practicable.</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		4.3-1(b) Construction Exhaust Emissions Minimization Plan. Prior to the initiation of construction, Rise Grass Valley Inc. or its designee shall submit a Construction Exhaust Emissions Minimization Plan to Nevada County or its designated representative for review and approval. The Construction Exhaust Emissions Minimization Plan shall detail project compliance with the following requirements: • Where access to alternative sources of power and alternative-fueled equipment are available, portable diesel engines shall be prohibited. • All diesel-powered equipment with engines equal to or greater than 50 horsepower (hp) shall be powered by California Air Resources Board (CARB) certified Tier 4 Final engines. If 50 hp or greater engines that comply with Tier 4 Final emissions standards are not commercially available, then the project applicant shall ensure that all diesel-powered equipment equal to or greater than 25 hp shall have at least CARB-certified Tier 3 engines with the most effective Verified Diesel Emission Control Strategies available for the engine type, such as Level 3 Diesel Particulate Filters	Nevada County Planning Department	Prior to the initiation of construction	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>(Tier 4 engines automatically meet this requirement).</i> a. <i>For purposes of this mitigation measure, “commercially available” shall mean the availability of the Tier 4 Final equipment.</i> b. <i>The project applicant shall maintain and submit records to Nevada County concerning its efforts to comply with this requirement.</i>			
4.3-2	Expose sensitive receptors to substantial pollutant concentrations.	4.3-2 Asbestos Dust Mitigation Plan. <i>Prior to the initiation of any clearing, grading, or construction activities, Rise Grass Valley Inc. shall submit an Asbestos Dust Mitigation Plan (ADMP) to Northern Sierra Air Quality Management District (NSAQMD) for review and approval. The provisions of the ADMP shall be initiated at the beginning of the project (before clearing or grubbing) and maintained for the duration of the project. The Asbestos Airborne Toxic Control Measure (ATCM) for Construction, Grading, Quarrying, and Surface Mining Operations (Title 17 of the California Code of Regulations [CCR] Section 93105) contains specific requirements for the preparation of an ADMP. Conditions of the ADMP shall include the following:</i> <i>Provisions of this ADMP shall apply throughout construction, operation,</i>	Northern Sierra Air Quality Management District (NSAQMD)	Prior to the initiation of any clearing, grading, or construction activities	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		and reclamation activities, except as specified otherwise. • All visible track-out material (from vehicles leaving the work site) must be removed from all public roads at least once per day using wet sweeping or a HEPA-filter-equipped vacuum device. Sweeping or vacuuming on public roads shall be conducted so as to avoid peak AM and PM traffic hours. • A gravel pad designed and maintained to effectively clean tires of exiting vehicles, or a wheel wash system, or a minimum of 50 feet of pavement must be placed between the construction area and any public road, and must be used by all exiting vehicles (including personal vehicles and delivery trucks) throughout the duration of the project. • All active storage piles shall be adequately wetted or covered with plastic to ensure that no visible dust crosses the property boundary. Potential dust emissions from disturbed surface areas and storage piles that will remain inactive for more than seven days shall be controlled to completely prevent visible dust from crossing the property boundary by at least one of			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>the following methods (pursuant to [e][4][C] of the ATCM):</i> <i>a. Keeping the surface adequately wetted;</i> <i>b. Applying chemical dust suppressants or chemical stabilizers according to the manufacturer's recommendations and all applicable regulations;</i> <i>c. Covering with tarp(s) or vegetative cover;</i> <i>d. Installing wind barriers of 50 percent porosity around three sides of all storage piles; and/or</i> <i>e. Installing wind barriers across open areas and between the project sites and any adjacent occupied residential or business property.</i> <i>• The maximum vehicle speed on all unpaved parts of the project sites must be clearly posted and must not exceed 15 miles per hour.</i> <i>• All areas where vehicles drive on the site, at all times when the area is subjected to vehicle or equipment traffic, shall be watered every two hours or kept adequately wetted to prevent visible dust emissions from leaving the property boundary,</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>except where a gravel cover has been established that has a silt content of less than five percent and an asbestos content of less than 0.25 percent and is at least three inches thick.</i> • <i>For all earthmoving activities, at least one of the following methods of dust control shall be implemented, pursuant to (e)(4)(E) of the ATCM:</i> a. <i>Pre-wetting the ground to the depth of anticipated cuts; and/or</i> b. <i>Suspending grading operations when visible dust emissions from any aspect of the grading (including tires, fans, and exhaust) cross the property line.</i> • <i>Trucks used for hauling material off site shall be maintained such that spillage cannot occur from holes or other openings.</i> • <i>All loads to be hauled off site shall be adequately wetted to prevent visible dust from escaping during transportation, pursuant to (e)(4)(F)2 of the ATCM, and shall either:</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		a. be completely covered with tarps; or b. have at least six inches of freeboard on the sides of the bed of the vehicle, with no excavated material extending above the edges of the vehicle bed at any point. • Upon completion of the project, disturbed surface areas shall be stabilized, pursuant to (e)(4)(G) of the ATCM, using one or more of the following methods: a. establishment of a vegetative cover; b. placement of at least three inches of material having an asbestos content of 0.25 percent asbestos or less as measured using an approved asbestos bulk test method; and/or c. paving. • The NSAQMD's Air Pollution Control Officer may require bulk sampling at any time. If bulk sampling is required, the sampling shall be performed in accordance with California Air Resources Board Test Method 435. Where Method 435 specifies			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>“serpentine,” this shall apply to gravel, decomposed ultramafic rock, and any other material as specified by the Air Pollution Control Officer.</i> <i>The NSAQMD’s Air Pollution Control Officer may require air monitoring at any time, and may modify the ADMP on the basis of results of the monitoring. If required, provisions of air monitoring shall be determined in coordination with the NSAQMD.</i> <i>Before site disturbance (e.g., clearing, grubbing, or grading) begins, the NSAQMD shall be informed by telephone at (530) 274-9360 of the exact day on which site disturbance will commence.</i>			
4.3-7	Generation of GHG emissions that may have a significant impact on the environment.	4.3-7(a) Construction GHG Emissions Reductions. <i>To reduce greenhouse gas (GHG) emissions generated during project construction from construction equipment, the following measures shall be incorporated into the project construction drawings:</i> <i>a) Properly tune and maintain all construction equipment in accordance with manufacturer’s specifications;</i> <i>b) Where feasible, employ the use of electrical or alternative fueled (i.e., non-diesel) construction equipment, including forklifts,</i>	Nevada County Planning Department	Prior to the approval of construction drawings	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		concrete/industrial saws, pumps, aerial lifts, air compressors, and other comparable equipment types to the extent commercially available; c) To reduce the need for electric generators and other fuel-powered equipment, provide on-site electrical hookups for the use of hand tools such as saws, drills, and compressors used for building construction; d) Encourage and provide carpools, shuttle vans, transit passes and/or secure bicycle parking for construction worker commutes; e) Use locally sourced or recycled materials for construction materials (goal of at least 20 percent based on costs for building materials, and based on volume for roadway, parking lot, sidewalk and curb materials). Wood products utilized should be certified through a sustainable forestry program; and f) Minimize the amount of concrete for paved surfaces or utilize a low carbon concrete option. 4.3-7(b) Carbon Offsets – Construction Emissions. Rise Grass Valley Inc. (Rise) shall retire carbon offsets in a quantity sufficient to offset the project's construction greenhouse gas (GHG) emissions to below the 1,100	Nevada County Planning Department	Prior to issuance of the first grading permit	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		metric ton carbon dioxide equivalent (MT CO₂e) per year construction threshold, consistent with the performance standards and requirements set forth below. Specifically, prior to Nevada County's (County) issuance of the project's first grading permit, Rise shall retire carbon offsets equaling 2,345 MT CO₂e, which was calculated by subtracting 1,100 MT CO₂e (threshold) from the construction emissions generated by the project. Carbon Offset Standards – Eligible Registries, Acceptable Protocols and Defined Terms: “Carbon offset” shall mean an instrument, credit or other certification verifying the reduction of GHG emissions issued by the Climate Action Reserve, the American Carbon Registry, or Verra (previously, the Verified Carbon Standard). This shall include, but is not limited to, an instrument, credit or other certification issued by these registries for GHG reduction activities within the Nevada County region. The Project shall neither purchase offsets from the Clean Development Mechanism (CDM) registry nor purchase offsets generated under CDM protocols. Qualifying carbon offsets presented for compliance with this mitigation measure may be used provided that the evidence required by the “Reporting and Enforcement Standards” below is submitted to the County demonstrating that each			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>registry shall continue its existing practice of requiring the following for the development and approval of protocols or methodologies:</i> <i>i) Adherence to established GHG accounting principles set forth in the International Organization for Standardization (ISO) 14064, Part 2 or the World Resources Institute/World Business Council for Sustainable Development (WRI/WBCSD) Greenhouse Gas Protocol for Project Accounting; and</i> <i>ii) Oversight of the implementation of protocols and methodologies that define the eligibility of carbon offset projects and set forth standards for the estimation, monitoring and verification of GHG reductions achieved from such projects. The protocols and methodologies shall:</i> <i>a. Be developed by the registries through a transparent public and expert stakeholder review process that affords an opportunity for comment and is informed by science;</i> <i>b. Incorporate standardized offset crediting parameters that define whether and how much emissions reduction credit a carbon offset project</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		should receive, having identified conservative project baselines and the length of the crediting period and considered potential leakage and quantification uncertainties; c. Establish data collection and monitoring procedures, mechanisms to ensure permanency in reductions, and additionality and geographic boundary provisions; and, d. Adhere to the principles set forth in the program manuals of each of the aforementioned registries, as such manuals are updated from time to time. e. Be approved by the California Air Resources Board, and be compliant with 17 CCR § 95972 and AB 32 (the California Global Warming Solutions Act of 2006) to the extent applicable to voluntary offsets. Further, any carbon offset used to reduce the project's GHG emissions shall be a carbon offset that represents the past reduction or sequestration of one MT of			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		CO₂e that is “not otherwise required” (CEQA Guidelines Section 15126.4[c][3]). Each carbon offset used to reduce GHG emissions shall achieve additional, real, permanent, quantifiable, verifiable, and enforceable reductions, which are defined for purposes of this mitigation measure as follows: i) “Additional” means that the carbon offset is in addition to: (1) any greenhouse gas emission reduction otherwise required by law or regulation; (2) any other GHG emissions reduction that otherwise would occur; and (3) is consistent with Health and Safety Code Section 38562(d)(2); ii) “Real” means that the GHG reduction underlying the carbon offset results from a demonstrable action or set of actions, and is quantified under the protocol or methodology using appropriate, accurate, and conservative methodologies that account for all GHG emissions sources and sinks within the boundary of the applicable carbon offset project, uncertainty, and the potential for activity shifting leakage and market-shifting leakage; iii) “Verifiable” means that the GHG reduction underlying the carbon			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		offset is well documented, transparent and set forth in a document prepared by an independent verification body that is accredited through the American National Standards Institute (ANSI); iv) "Permanent" means that the GHG reduction underlying the carbon offset is not reversible; or, when GHG reduction may be reversible, that a mechanism is in place to replace any reversed GHG emission reduction; v) "Quantifiable" means the ability to accurately measure and calculate the GHG reduction relative to a project baseline in a reliable and replicable manner for all GHG emission sources and sinks included within the boundary of the carbon offset project, while accounting for uncertainty and leakage; and vi) "Enforceable" means that the implementation of the GHG reduction activity must represent the legally binding commitment of the offset project developer to undertake and carry it out. The protocols and methodologies of the Climate Action Reserve, the American Carbon Registry, and Verra establish and require carbon offset projects to comply with			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>standards designed to achieve additional, real, permanent, quantifiable, verifiable and enforceable reductions. Additionally, the “Reporting and Enforcement Standards” below ensure that the emissions reductions required by this mitigation measure are enforceable against Rise, as the County has authority to hold Rise accountable and to take appropriate corrective action if the County determines that any carbon offsets do not comply with the requirements set forth in this mitigation measure.</i> <i>The above definitions are provided as criteria and performance standards associated with the use of carbon offsets. Such criteria and performance standards are intended only to further construe the standards under CEQA for mitigation related to GHG emissions (see, e.g., State CEQA Guidelines Section 15126.4(a), (c)), and are not intended to apply or incorporate the requirements of any other statutory or regulatory scheme not applicable to the project (e.g., the Cap-and-Trade Program).</i> <i>Additionally, the County shall require that all carbon offsets purchased by the Project applicant shall originate from inside the state of California.</i> Reporting and Enforcement Standards: <i>Prior to issuance of requested grading permits, Rise shall submit a report to the</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		County that identifies the quantity of emission reductions required by this mitigation measure, as well as the carbon offsets to be retired to achieve compliance with this measure. For purposes of demonstrating that each offset is additional, real, permanent, quantifiable, verifiable and enforceable, the report shall include: (i) the applicable protocol(s) and methodologies associated with the carbon offsets, (ii) the third-party verification report(s) and statement(s) affiliated with the carbon offset projects, (iii) the unique serial numbers assigned by the registry(ies) to the carbon offsets to be retired, which serves as evidence that the registry has determined the carbon offset project to have been implemented in accordance with the applicable protocol or methodology and ensures that the offsets cannot be further used in any manner, and information sufficient for the County to verify that the purchased offsets meet the requirements identified within this mitigation. To ensure consistent and effective enforcement of this mitigation measure and to assist the County with its review of the report described above, an implementation process timeline and associated flow chart for the implementation and administration of this mitigation measure's requirements has			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		been prepared and is attached as Appendix F to the FEIR. If the County determines that the project's carbon offsets do meet the requirements of this mitigation measure, the offsets can be used to reduce project GHG emissions and project permits shall be issued. If the County determines that the project's carbon offsets do not meet the requirements of this mitigation measure, the offsets cannot be used to reduce project GHG emissions and project permits shall not be issued. Additionally, the County may issue a notice of non-consistency and cease permitting activities in the event that the County determines the carbon offsets provided to reduce project GHG emissions are not compliant with the aforementioned standards. In the event of such an occurrence, project permitting activities shall not resume until Rise has demonstrated that the previously provided carbon offsets are compliant with the standards herein or have provided substitute carbon offsets achieving the standards of this mitigation measure in the quantity needed to achieve the required emission reduction. In the event that the project is out of compliance with this Mitigation Measure and fails to demonstrate compliance after receiving notice of said violation, the County shall have authority to impose administrative penalties, take legal action to force compliance, or to start			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>proceedings to suspend or revoke the Project's permits.</i>			
4.4 Biological Resources					
4.4-1	Have a substantial adverse effect to special-status plant species either directly or through habitat modifications.	<i>Pine Hill Flannelbush</i> 4.4-1(a) i. <i>Prior to issuance of grading permits for the Centennial Industrial Site, the project applicant shall obtain an Incidental Take Permit (ITP) from CDFW for Project-related impacts to the Pine Hill Flannelbush. During the consultation process with CDFW, the Centennial Pine Hill Flannelbush Habitat Management Plan (Matuzak 2021) (HMP) shall be revised if required by CDFW, and must be approved by CDFW prior to implementation. This HMP shall include habitat enhancement and conservation easement requirements. If the USFWS determines that the plants within the Study Area are the federally endangered Pine Hill flannelbush prior to project implementation, then a USFWS Biological Opinion must also be secured, and the USFWS would also need to approve the HMP prior to implementation. Note that the measures outlined below are minimum measures, and additional measures may be required by CDFW to be included in the HMP during consultation.</i> <i>Prior to issuance of grading permits for the Centennial Industrial Site, implement project-specific mitigation measures 1-3</i>	Nevada County Planning Department U.S. Fish and Wildlife Service (USFWS) California Department of Fish and Wildlife (CDFW)	Prior to the issuance of grading permits for the Centennial Industrial Site	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>outlined below consistent with the County and CDFW approved HMP, as well as the Habitat Enhancement and Conservation Easement. Project-specific mitigation measures generally include protective measures for the Pine Hill flannelbush within the on-site avoidance area. For project actions that will directly impact the Pine Hill flannelbush, measure 4 (monitoring) shall occur on an ongoing basis, and measure 5 depends upon the results of monitoring, and thus, measures 4 and 5 are not required prior to issuance of grading permits).</i> 1. Seed Collection; <i>Collect seed for seedbanking and for future replacement and recovery efforts pursuant to the requirements of Section 6.2 of the HMP.</i> 2. Develop Transplantation Plan and Monitoring Plan; <i>The Transplantation and Monitoring Plan shall be developed in consultation with USFWS and CDFW, and shall, at a minimum, address location(s) for dormant season relocation, site selection for transplanting, and metrics of successful establishment (i.e., Section 6 of the HMP).</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		3. <i>Transplanting;</i> <i>Transplant the individuals of Pine Hill flannelbush that fall within the disturbance footprint to another site with similar soil, hydrologic, vegetation type and aspect. The transplantation site(s) selected shall extend the known population spatially, in other words, planting beyond the known perimeters of the existing population is preferable, to maintain population coverage. Transplanting shall occur in the season deemed to have the greatest potential for success, generally the fall, after rains have commenced.</i> 4. <i>Transplant Monitoring; and</i> <i>Transplants shall be monitored every month for the first six months, then subsequently, every two months for the first two years. After monitoring identifies successful establishment and flowering for the second season for each of the transplants, transplanting will have been deemed successful.</i> 5. <i>Alternative Measures to Transplantation and Seed Collection (if required pursuant to the criteria in the HMP)</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>If Steps 1-4 of the HMP are not successful in maintaining the Pine Hill flannelbush population numbers, then the following measures shall be taken:</i> <i>Individuals shall be grown from seed and transplanted out in a 100:1 ratio for those taken.</i> <i>Transplants of individuals grown from seed shall be planted with similar soil, hydrologic, vegetation type and aspect.</i> <i>Transplanting shall occur in the season deemed to have the greatest potential for success, generally the fall, after rains have commenced.</i> <i>Transplants shall be monitored every month for the first six months, then subsequently, every two months for the first two years.</i> <i>ii. Habitat Enhancement: Prior to issuance of grading permits, pursuant to the HMP, the applicant shall enhance Pine Hill flannelbush habitat outside the disturbance footprint, which could include removal of invasive plants and conducting a pilot study by collaborating with CAL FIRE or other research facility to conduct prescribed fire in areas to enhance natural germination and</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		recruitment, as Pine Hill flannelbush need fire for successful germination, and root sprouts. iii. <u>Conservation Easement:</u> Prior to issuance of grading permits, the applicant shall record a Conservation Easement for the on-site Pine Hill flannelbush avoidance area, or use a similar land protection mechanism that runs with the land in perpetuity, to protect the Pine Hill flannelbush plants within the avoidance area. The management guidelines for the Conservation Easement or similar mechanism shall require that the habitat be managed for the Pine Hill flannelbush and its associated habitat. The applicant shall also record a Conservation Easement or use a similar land protection mechanism for any off-site areas not owned by the applicant where the transplants are to be located. Other Special-Status Plant Species 4.4-1(b) Prior to issuance of grading permits for the Centennial Industrial Site and Brunswick Area (i.e., Brunswick Industrial Site and East Bennett Road ROW), focused plant surveys shall be performed according to CDFW and CNPS protocol (e.g., "Proctols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities", CDFW 2018), as generally described below. If			
			Nevada County Planning Department	Prior to the issuance of grading permits for the Centennial Industrial Site and Brunswick Area (i.e., Brunswick Industrial Site and East Bennett Road ROW)	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>special-status plant species (i.e., federal and/or state endangered, threatened, or proposed candidates for listing; CRPR Lists 1 or 2) are not found during appropriately timed focused surveys, then further mitigation is not necessary. The results of the surveys shall be submitted to the Nevada County Planning Department.</i> <i>Prior to Improvement Plan approval for each phase of the project, focused surveys shall be performed by a qualified botanist during the appropriate early blooming period for those special-status plant species identified in the Biological Resources Assessments as potential occurring within the Centennial Industrial Site and/or Brunswick Area. Furthermore, should additional plants having the potential to occur within these areas be given special-status in the future, the qualified botanist shall also determine the presence/absence of such species. The survey(s) shall be conducted on-site as well as in any off-site improvement areas, as applicable for each phase, during the early identification periods (bloom periods) for all potentially occurring special-status plant species. If the special-status plant species are not found to be present during the focused survey(s), then no further action is required. The results of the focused surveys shall be submitted to the Nevada County Planning Department.</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>If any special-status plant species are found, and they are located in an area where impacts are proposed, then the special-status plants shall be completely avoided until a Habitat Management Plan (HMP) is developed and approved by the Nevada County Planning Department. If the plant is listed on the federal or state Endangered Species lists or is state listed as rare, then development of this plan shall be conducted in consultation with USFWS and/or CDFW, respectively, and a BO and/or an ITP shall be obtained prior to impacts. The HMP shall include the avoidance, minimization, and mitigation measures outlined below as part of compliance with the Nevada County Land Use and Development Code, Section L-II 4.3.12. Note that transplantation and monitoring specifics are examples only, and final details will be developed based on the species to be impacted, if any.</i> <i>At a minimum, the HMP shall include the following protective measures for special-status plant species with the potential to be impacted by the proposed disturbance:</i> <i>• a map of the location of special-status species that may be disturbed or need to be protected;</i> <i>• location of environmental protection fencing to be placed around the individual plants to be protected;</i>			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		• identification of the location of protected plants on design and construction drawings; • environmental awareness training for all personnel working on the project during initial site disturbance to discuss the location of the protected plants and the measures to be taken to avoid impacts to them; and • a qualified biologist shall be onsite during all vegetation and ground disturbing activities that are within the vicinity of special-status plants and weekly monitoring of the protective fencing along fencing along the buffer zone. Where individuals would be potentially affected directly by site disturbance and translocation of individual plants is required to minimize and mitigate for impacts to such species, the following shall be integrated into the HMP: • remove bulbs of individual plants to be directly impacted during the dormant season; • relocate the bulbs to a site with similar soil, hydrologic, vegetation type and aspect as the portion of the project site where the plants are found; and			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		- identify the location(s) for dormant season relocation and site selection for transplantation. The HMP would also include a requirement to meet the following criteria: - metrics of successful establishment, which would include a minimum of 80 percent survival of the transplants after two years of transplanting the species. If the 80 percent survival is not established after two years, transplants of individuals grown from seed shall be planted at a location with similar soil, hydrologic, vegetation type and aspect as the portion of the site where they are found. Transplantation shall occur in the season deemed to have the greatest potential for success, generally the fall, after rains have commenced. Transplants shall be monitored every month for the first six months, then every two months for a minimum of two years. After two summer seasons of monitoring identifies successful establishment of 50 percent of the initial transplants, transplant seedlings will be deemed successful.			
4.4-2	Have a substantial adverse effect, either directly or through habitat modifications, on	Foothill Yellow-Legged Frog 4.4-2(a) <u>Pre-construction Survey and Avoidance and Minimization Measures.</u> A pre-construction survey shall be conducted by a qualified	Nevada County Planning Department	No more than 14 days prior to disturbance within and directly

Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		areas would have no impact on this species. <u>Watercourse/Wetlands/Riparian Areas Management Plans.</u> The applicant shall implement the mitigation measures identified in the Aquatic Resources Management Plans for the Centennial and Brunswick Industrial Sites, pursuant to Mitigation Measure 4.4-3, which include measures designed to protect aquatic resources and the biological resources they support. Such measures generally include, but are not limited to, mitigation for encroachment into non-disturbance buffers, restoration of impacted areas within stream zones, implementation of BMPs during construction, and post construction erosion control. <u>Coast Horned Lizard</u> 4.4-2(e) <u>Pre-construction Survey and Avoidance and Minimization Measures.</u> A pre-construction survey shall be conducted by a qualified biologist no more than seven (7) days prior to disturbance within the areas of the Centennial and Brunswick Industrial Sites that contain disturbed or developed surfaces and annual grassland vegetation community. If the pre-construction survey does not show evidence of coast horned lizard, a letter report documenting the results of the survey shall be provided to the Nevada County Planning Department, and additional measures are not required.	Nevada County Planning Department	No more than seven days prior to disturbance within the areas of the Centennial and Brunswick Industrial Sites that contain disturbed or developed surfaces and annual grassland vegetation community	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		If the species is documented during pre-construction survey(s), a qualified wildlife biologist (approved by CDFW) shall move individual coast horned lizards outside of the proposed disturbance area(s) in order to avoid an impact to this species. The qualified biologist shall have all required permits before commencing species specific surveys. Once the coast horned lizard(s) have been removed from the disturbance area(s) and out of harm's way, the proposed work would no longer pose a risk to individuals of the species. Special-Status Bats 4.4-2(f) <u>Pre-construction Survey and Avoidance and Minimization Measures.</u> A pre-construction bat roosting survey shall be conducted by a qualified biologist no more than seven (7) days prior to disturbance of any structures or riparian and forested woodlands within the Centennial Industrial Site and Brunswick Area to identify the presence or absence of roosting bats. If the pre-construction survey does not show evidence of roosting bats, a letter report documenting the results of the survey shall be provided to the Nevada County Planning Department, and additional measures are not required. If any Townsend's big-eared bats (or any other species of bat, including the hoary and pallid bat) are identified during roosting surveys, passive removal of the roosting	Nevada County Planning Department	No more than seven days prior to disturbance of any structures or riparian and forested woodlands within the Centennial Industrial Site and Brunswick Area	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		bats prior to disturbance to structures and riparian and forested woodlands shall be implemented to avoid impacts to this species. Passive removal includes allowing roosting bats to freely leave the roost site (riparian and forested woodlands and any structure). Once the roosting bats have been passively removed from the structure(s) and riparian and forested woodlands, the structure(s) would be closed off from recurring bat roosting within the structure(s) and the proposed work within the structure(s) would no longer pose a risk to individuals of the species. For riparian and forested woodlands containing bat roosts, the removal of trees associated with such woodlands would only occur once the bats leave the day roosts. Furthermore, if a maternal (breeding) roost is documented, no disturbance shall occur until a qualified bat biologist has determined the young bats are no longer roosting and the breeding roost has dispersed from the structure or riparian and forested woodlands they are found in. Nesting Birds 4.4-2(g) <u>Pre-construction Survey and Avoidance and Minimization Measures.</u> Prior to initiation of ground-disturbing activities for any phase of project construction, if construction is expected to occur during the raptor nesting season (February 1 to August 31), a qualified biologist shall conduct a preconstruction survey prior to vegetation			
			Nevada County Planning Department	Within seven days prior to commencement of ground-disturbing activities for any phase of project construction, if construction is expected to occur

Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		removal, including one daytime survey and one nighttime survey targeted at California spotted owl, consistent with the USFWS (1992) California spotted owl survey protocol. The pre-construction survey shall be conducted within 7 days prior to commencement of ground-disturbing activities. The survey shall be conducted within all areas of proposed disturbance and all accessible areas within 250 feet of proposed disturbance. If the pre-construction survey does not show evidence of active nests, a letter report documenting the results of the survey shall be provided to the Nevada County Planning Department, and additional measures are not required. If construction does not commence within 7 days of the pre-construction survey, or halts for more than 14 days, an additional pre-construction survey shall be required. Removal of any trees within the Brunswick Area would occur between September 1st and January 31st to ensure that no nesting birds, raptors, or owls would be impacted by the proposed IMM project. If any active nests are located within the proposed disturbance area, including active nests within riparian habitat for the yellow-breasted chat, willow flycatcher, yellow warbler, and olive-sided flycatcher, an appropriate buffer zone shall be established around the nests, as determined by the project biologist. The biologist shall mark the		during the raptor nesting season (February 1 to August 31)	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		buffer zone with construction tape or pin flags and maintain the buffer zone until the end of breeding season or the young have successfully fledged. Buffer zones are typically 100 feet for migratory bird nests and 500 feet for raptor nests. If active nests are found within the disturbance footprint, a qualified biologist shall monitor nests weekly during construction to evaluate potential nesting disturbance by construction activities. Guidance from CDFW shall be required if establishing the typical buffer zone is impractical and/or the willow flycatcher, a State listed species, is documented nesting during the pre-construction surveys for nesting birds. Additionally, an ITP could be required by CDFW if complete avoidance of willow flycatcher is not feasible. If construction activities cause the nesting bird(s) to vocalize, make defensive flights at intruders, get up from a brooding position, or fly off the nest, then the exclusionary buffer shall be increased, as determined by the qualified biologist, such that activities are far enough from the nest to stop the agitated behavior. The exclusionary buffer shall remain in place until the young have fledged or as otherwise determined by a qualified biologist.			
4.4-3	Have a substantial adverse effect on riparian habitat or other sensitive natural community, or State or	4.4-3(a) Prior to initiation of ground-disturbing activities, the applicant shall provide a US Army Corps of Engineers (Corps) verification letter to the Nevada County Planning Department, indicating Corps'	Nevada County Planning Department	Prior to initiation of ground-disturbing activities

		repair work, for review and approval of the Nevada County Building Department. The submittal shall be prepared and stamped by a licensed geotechnical engineer. The grading plan and cross sections shall depict typical temporary cut slope gradients, excavation depths, maximum water surface elevation, and earthwork volume estimates, and any additional geotechnical engineering methods, such as shoring, to mitigate potential slope instability. 4.6-3(c) In conjunction with submittal of Improvements Plans for the Centennial and Brunswick Industrial Sites, the applicant shall submit a physical closure evaluation of the following near-surface mine features to the Nevada County Building Department: • East Eureka Shaft (shall be closed prior to initial mine dewatering) • East Eureka Drain (shall be closed prior to initial mine dewatering) • Idaho Drain Tunnel (shall be closed prior to initial mine dewatering) • Idaho Pump Shaft (shall be closed prior to initial mine dewatering) • Idaho Shaft (shall be closed prior to initial mine dewatering) • South Idaho Shaft (shall be closed prior to placement of engineered fill at the Centennial Industrial Site)	Nevada County Building Department	In conjunction with submittal of Improvement Plans for the Centennial and Brunswick Industrial Sites	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		<i>The evaluation shall be stamped by a licensed geotechnical engineer and identify methods of physical closure, based on overexcavation of surface soil in the areas of these features to determine where competent, native soil/rock is located and to identify the trend of any subsurface mining-related structures. Closure methods could include but not be limited to the use of a cast-in-place concrete cap or plug supported by temporary false work and covered to the ground surface with engineered fill. The closure design shall include drainage piping for those near surface features that currently discharge groundwater, and closure shall occur prior to initial mine dewatering or, for the South Idaho Shaft, prior to the placement of engineered fill at the Centennial Industrial Site.</i>			
4.6-4	Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water.	<i>4.6-4 In conjunction with submittal of Improvement Plans, the project applicant shall submit a complete sewage disposal design report accounting for all sewage waste water disposal per project buildout, for review and approval of the Nevada County Environmental Health Department. Unless otherwise determined in the sewage disposal design report, the Improvement Plans shall comply with the recommendations set forth in the septic system evaluation prepared for the Brunswick Industrial Site by Navo & Sons, Inc., including the following:</i>	Nevada County Environmental Health Department	In conjunction with submittal of Improvement Plans	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		- Leach lines shall be installed 36 inches wide by 24 inches deep, with 12 inches of drain rock and 7-foot separation on center per line, installed level on contour. - The leach shall be pressure dosed leach lines consisting of a minimum of four zones. The rotation of zones would allow the zones to rest in between doses and prevent over saturation of any one zone. In addition, if one zone has a problem, that zone could be isolated and repaired while other zones are working. This would result in little to no downtime and greatly reduce the possibility of sewage spills (surfacing). - Duplex (two) pumps shall be used in the pump tank to ensure that if one pump fails, a backup exists. The pumps would alternate to the extent of their life, unless one fails. - Due to the distance and elevation between the proposed shower and laundry area to the leach field, the pump line would be running through a low area upgradient from potentially sensitive areas. The pump line shall be sleeved in this low area to avoid potential issues related to sensitive areas if the line were to rupture.			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		- During installation, existing trees shall be maintained in place to the extent feasible to avoid the creation of large holes in the leach area, help stabilize soil, and help absorb leaching effluent. - The following setbacks shall be maintained: 10 feet from developed property lines; 50 feet from undeveloped property lines; 50 feet from seasonal drainages; 25 feet from center line of swales; and 100 feet from any perennial streams or domestic wells. - The pressure dose septic system shall be maintained annually for the life of the system. - The septic system shall be installed by a licensed contractor (A, C-34, or C-42) familiar with installation of the proposed system. - A permit to install the septic system shall be obtained from the NCEHD. - The pump screen shall be removed and rinsed annually.			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		- The pump, pump float, alarm float, and alarm shall be checked for proper operation annually. - The primary and 100 percent repair area shall be protected from vehicular traffic, structures, or any other activity that may cause alterations such as grading, cuts/fills, etc. - All drainage shall be diverted away from the septic tank, pump tank, and leach field. Irrigation in the area of the leach trenches shall be kept to a minimum to avoid saturation of the soil. Drip irrigation should be used. - Water conservation is recommended to maximize the life expectancy of the absorption trenches. - Any leaks shall be fixed immediately to avoid unnecessary saturation of the leach trenches.			
4.7 Hazards and Hazardous Materials					
4.7-1	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials.	4.7-1(a) The mine operator shall comply with all applicable federal and state regulations governing the transport, underground storage and use of explosives, including MSHA (CFR Title 30, Part 57), OSHA (CFR Title 29, Part 1910 and 1926), and CCR (Title 8, Part 5251ff. and 5291).	Nevada County Environmental Health Department	During the transport, underground storage, and use of explosives

		process. 10) All easements necessary for construction and ongoing maintenance of the new pipeline shall be acquired by the applicant and conveyed to NID prior to acceptance of the new potable line. Proof of satisfaction of this measure shall be provided to Nevada County Environmental Health Department for each property identified in the Well Mitigation Plan.			
4.8-3	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would: i) Result in substantial erosion or siltation on- or off-site? ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?	4.8-3 As part of the Improvement Plan submittal process, the applicant shall submit a Final Drainage Report to the Nevada County Planning and Public Works Departments for review and approval. The Final Drainage Report may require more detail than that provided in the preliminary report, and will be reviewed in concert with the Improvement Plans to confirm conformity. The report shall address the Centennial and Brunswick Industrial Sites, be prepared by a Registered Civil Engineer, and shall, at a minimum, include: narrative describing existing conditions, the effects of the proposed improvements, all appropriate calculations, watershed maps, changes in flows and patterns, and proposed on- and off-site improvements to accommodate flows from this project, including treated mine water discharge and stormwater runoff. The Final Drainage Report shall demonstrate that the on-site storm drain systems are sized such	Nevada County Planning Department Nevada County Public Works Department	Prior to approval of Improvement Plans

Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
	iii) Create or contribute to runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff? iv) Impede or redirect flood flows?	<i>that site runoff (in addition to treated mine discharge for the Brunswick Industrial Site) under the post-development condition will not exceed pre-development levels in the downstream channel(s) during the design storm events.</i>			
4.8-5	In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation.	4.8-5 <i>The applicant shall implement the Floodplain Management Plan prepared for the Centennial Industrial Site, as approved in its final form by Nevada County. Specifically, the applicant shall implement the mitigation measures and conditions identified in the Floodplain Management Plan, which include measures designed to mitigate the impact of development on the floodplain. Such measures generally include, but are not limited to, the following and shall be implemented in accordance with their specified timing (e.g., either prior to, during, or after ground disturbance activities within the 100-foot floodplain buffer):</i> <i>Grading and land disturbance within the limits of the SFHA (100-year floodplain) of Wolf Creek shall be avoided.</i>	Nevada County Planning Department	Prior to, during, and after ground disturbance activities within the 100-foot floodplain buffer	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		- Prior to commencing construction, the 100-year floodplain boundary shall be delineated by appropriate means on the Centennial Industrial Site to ensure that construction activities remain outside the 100-year floodplain. - As early as practicable once the engineered fill development has begun, the detention basin proposed in the Preliminary Drainage Analysis & Detention Study by Nevada City Engineering, Inc. shall be installed and made operational. During the grading operation, erosion control measures should be maintained in place on the fill pad to avoid silt and runoff from the pad proceeding down the fill slope towards Wolf Creek, and to direct all runoff to the detention basin which is to be constructed at the northwest corner of the fill area. During this time all potential runoff from the engineered fill pad area shall concurrently be directed to this basin for both its detention and de-siltation benefits. - No significant increase in impermeable surfaces shall occur within 100 feet of the 100-year floodplain. The only added impervious surface shall be			

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		approximately 520 lineal feet of concrete V-ditch at the toe of the engineered fill slope. This will have no measurable impact on drainage runoff or flooding. - Areas within 100 feet of the 100-year floodplain, which are disturbed due to construction activity, shall be regraded to a smooth, natural contour resembling their pre-development configuration, with the exception of approximately 0.55-acre of engineered fill located on the northeast corner of the proposed Centennial Industrial Site. Grading shall be done in such a manner as to smoothly convey flows through the property without accelerating their transit to downstream areas. All disturbed areas shall be subject to erosion control measures and protection during and after the engineered fill placement operation in order to stabilize any disturbed soil, thus eliminating the likelihood of increased erosion exiting the site toward downstream properties. - Temporary disturbance of vegetation within 100 feet of the 100-year floodplain due to construction shall be remediated by appropriate replacement plantings as recommended by the

Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		○ Coordination with adjacent property owners, as applicable, to maintain tree canopies, vegetation and ladder fuels on an annual basis. ○ Horizontal and vertical spacing among shrubs and trees shall be created using the "Fuel Separation" method, the "Continuous Tree Canopy" method or a combination of both to achieve defensible space clearance requirements. Spacing shall be done in accordance with the State Board of Forestry and Fire Protection's, "General Guidelines for Creating Defensible Space, February 8, 2006."			
Conditions of Approval					
COA-1	<u>APM-AQ-1: Exhaust Emission Controls</u> The following measures shall be implemented during construction, operation, and reclamation to reduce exhaust emissions: • All off-road diesel-fueled equipment and emergency generators owned by Rise Grass Valley Inc. shall be equipped with Tier 4 Final engines. • Unnecessary construction vehicle idling time shall be minimized. The ability to limit construction vehicle idling time is dependent on the sequence of activities and when and where vehicles are needed or staged. Certain vehicles, such as large diesel-powered vehicles, have extended warm-up		Nevada County Planning Department	During construction, operation, and reclamation activities	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
	<i>times following start-up that limit their availability for immediate use. Where such diesel-powered vehicles are required for repetitive construction tasks, these vehicles may require more idling time. The project shall apply a “common sense” approach to vehicle use such that idling is reduced as much as possible below the maximum of 5 consecutive minutes required by regulation (13 CCR 2449 and 2485). If a vehicle is not required for use immediately or continuously for activities or for other safety-related reasons, its engine shall be shut off.</i> <i>All off-road equipment shall be maintained in accordance with manufacturer’s specifications. All equipment shall be checked by a qualified mechanic, and equipment shall be confirmed that it is in proper condition prior to operation.</i>				
COA-2	<u>APM-AQ-2: Surface Fugitive Dust Controls</u> <i>The following measures shall be implemented to reduce surface fugitive dust emissions:</i> <i>During construction, operation, and reclamation, all exposed soil surfaces (e.g., unpaved disturbed areas, unpaved parking areas, and unpaved staging areas, and soil piles) shall be adequately wetted to ensure that no visible dust crosses the property boundary, except when rains are occurring. As an alternative to watering, inactive soil piles shall be covered to minimize wind erosion.</i> <i>During construction, all on-site roadways shall be paved as soon as possible after grading and any unpaved gravel roads shall be treated with chemical stabilizers in order to control fugitive dust.</i>		Nevada County Planning Department	During construction, operation, and reclamation activities	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
COA-3	<u>APM-AQ-3: ASUR Plan</u> <i>Rise Grass Valley Inc. shall implement the ASUR Plan, which incorporates measures designed to minimize asbestos in engineered fill produced by the project, as well as minimize the emission of asbestos-containing dust from the underground mine (see Appendix E.2). The ASUR Plan builds on the provisions of applicable regulations, including the two CARB ATCMs for naturally occurring asbestos (i.e., ATCM for Surfacing Applications [17 CCR 93106] and ATCM for Construction, Grading, Quarrying and Surface Mining Operations [17 CCR 93105]), and includes additional measures beyond what is required in the ATCMs in order to limit any potential emission of asbestos dust and to protect human health and the environment. The ASUR Plan incorporates routine asbestos testing by TEM and an Asbestos Inventory to ensure that average mined material and engineered fill contains less than 0.01 percent asbestos by mass of PCM equivalent units.</i>		Nevada County Planning Department	During project operations	
COA-4	<i>In the event that sand tailings or waste rock material is transported from the Brunswick Site prior to 2033 to locations other than the Centennial Site, all transport of such material shall be accomplished using electric vehicles.</i>		Nevada County Planning Department	In the event that sand tailings or waste rock material is transported from the Brunswick Site prior to 2033 to locations other than the Centennial Site	
COA-5	<i>Except for the construction of the proposed Service Shaft, all underground blasting for production, tunnelling, and raising would take place more than 500 feet below ground surface and no underground mining will take place outside of the area denoted on the maps included in Appendix A of the Final EIR.</i>		Nevada County Planning Department	During blasting activities	
COA-6	<i>The following measures have been added to the Domestic Well Monitoring Program, and shall be included as a condition of approval for the Project:</i> 1) <i>Property owner's shown in Table 1 will be contacted at least three months prior to commencement of the required 12-month groundwater monitoring period and the company will request permission to inspect and install monitoring equipment at the well.</i>		Nevada County Planning Department	As part of the Domestic Well Monitoring Program implementation	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
		2) Property owners who respond and grant permission for well monitoring will be added to the Domestic Well Monitoring Program. 3) The well will be inspected to determine the characteristics of the well, including location, well depth, casing and screen depth, static water level, and well yield. A water quality sample will be taken during the inspection. 4) Instrumentation will be installed to measure water level on a periodic basis (such as 1 or 4 hours) and pumping rates (to correlate water level with the wells use). Data from the instruments will be transmitted by telemetry. 5) Water level data will be collected for at least 12 months prior to the commencement of mine dewatering and will continue throughout the period of initial mine dewatering (dewatering of the historic mine workings) and for at least the first 5 years of operations. 6) All data collected and reports generated will be provided to the property owner and to Nevada County. 7) All costs of well monitoring will be paid by the company and well monitoring equipment will remain the property of the company. A property owner may terminate well monitoring upon request and the company will remove any installed monitoring equipment. 8) For any well that is monitored under the Domestic Well Monitoring Program, monitoring results will be used to supplement the analysis from the Groundwater Monitoring Plan to determine whether an individual groundwater well is expected to be impacted or has been impacted by dewatering operations, using the threshold set forth in the Well Mitigation Plan.			
COA 7	The applicant shall be required to install all noise reducing project features and equipment included in the Project Description, and assumed in the noise impact analysis included in Chapter 4.10 of the DEIR. While the applicant is not required to use the specific brands and models assumed in the DEIR, the applicant shall be required to demonstrate that the noise reducing project features and equipment actually installed as part of the project achieve the same or better noise reduction as was assumed in the DEIR. The applicant shall be required to provide specifications on all installed noise reduction features and equipment to the County		Nevada County Planning Department	During construction, operation, and reclamation activities	

MITIGATION MONITORING AND REPORTING PROGRAM Idaho-Maryland Mine Project					
Impact Number	Impact	Mitigation Measures	Monitoring Agency	Implementation Schedule	Sign-off
	<i>to verify that the noise reductions comply with the assumptions in the DEIR. Further, the County will verify and enforce use and operation of noise reduction equipment and features through implementation of Mitigation Measure 4.10-3.</i>				
COA 8	<i>The applicant shall be required to use only electrical, pneumatic, or battery powered mining equipment in the underground mine.</i>		Nevada County Planning Department	During mining activities	
COA 9	<i>The project will not burn vegetative material. Processing of vegetation before placement of engineered fill will be done by chipping.</i>		Nevada County Planning Department	During construction, operation, and reclamation activities	
COA 10	<i>The applicant will be required to provide one-week notice of any expected flow interruptions when feasible, and notice of any spill or contaminating event. Additionally, the applicant will be required to provide NID access to real-time flow data of South Fork Wolf Creek directly downstream from the Project's discharge, with 15-minute interval data, with a trend history of at least one week. The County will not require the flow data to be publicly available, but the data may be made publicly available at the applicant's or NID's discretion.</i>		Nevada County Planning Department	One week prior to, and during, any expected flow interruptions, and in the event of any spill or contaminating event	
COA 11	<i>To ensure that reclamation will proceed in compliance with the approved Reclamation Plan, the County shall require security that will be released upon satisfactory performance. The Project Applicant may post security in the form of a surety bond, trust fund, irrevocable letter of credit from an accredited financial institution, or other method acceptable to the County and the State Mining and Geology Board as specified in State regulations, and which the County reasonably determines are adequate to perform reclamation in accordance with the mining operation's approved Plan.</i>		Nevada County Planning Department	Prior to commencement of mining operations	
COA 12	<i>Except for the construction of the proposed Service Shaft, all underground blasting for production, tunnelling, and raising would take place more than 500 feet below ground surface and no underground mining will take place outside of the area denoted on the maps included in Appendix A of the Final EIR.</i>		Nevada County Planning Department	Prior to approval of improvement plans and during construction and operation
