

Direction and Control of the Search Function Advanced Course

Hosted By:
Placer County Sheriff's Office
July 8-11, 2024
POST Control #: TBD

The "Direction and Control of the Search Function Advanced Course" is a 4-day, 32-hour course with trained, professional, and experienced instructors. The course is directed toward search and rescue coordinators, their alternates, team leaders and others having those responsibilities. This course is designed to teach search and rescue personnel how to manage extended multi-day search and rescue operations.

COURSE OBJECTIVES INCLUDE:

- How to properly manage an extended mutual aid search; leadership and safety, effective briefings, managing the Incident within the Incident
- How to utilize CALTopo for search management, mapping, assignment building and managing large search datasets
- How to apply resources efficiently; search theory, terrain-driven search management, environment considerations, assignment segmentation
- Students will learn remote planning and collaboration concepts utilizing CALTopo, Google sheets IAP Builder and live tracking of resources on CALTopo app.

- How to manage daily operations via the "Planning P"; the daily planning cycle leading to the IAP for the next operational period
- How to manage specialized incidents, including abductions and fire evacuation/recovery operations
- Multiple tabletop scenarios; creating effective search plans, map packages, IAPs, and effective operational briefings
- A review of multiple case studies

COURSE REQUIREMENTS:

For success, students will need to bring a laptop (no tablets please) and will need to download the CALTopo app on their smartphone. There will be extended periods utilizing laptops for tabletop scenarios, students should bring back up power options such as an extension cord, strip, or battery pack.

STRONGLY ENCOURAGED:

Cal Topo has a mapping and incident response course available at <https://training.caltopo.com/firstresponse/course>. This self-paced course gives students a strong foundation in computer mapping **which will assist them in getting the most out of the Direction and Control of the Search Function Advanced Course, and it is strongly encouraged that students complete it prior to the class.**
